

UK Research and Innovation

Equality, Diversity and Inclusion film - transcript

Nicole Logan-Park, Facilities Engineer, British Antarctic Survey: "Accept people for who they are what they bring to the table."

Tristan Canfer, Diagnostic Technician, Science and Technology Facilities Council: "Everyone should be able to bring their entire selves to work. No one should have to hide any part of themselves to be acceptable and professional in everyone else's eyes."

Huw Griffiths, Marine Biologist, British Antarctic Survey: "As a member of a minority myself I know how it feels when you aren't included. But I also know as a scientist, that having a whole range of ideas really strengthens the science and increases the work we can do."

Professor Tom Welton, Dean of Faculty of Natural Sciences, Imperial College London: "Who would want an excluding and narrow research environment? It just wouldn't work."

Dr Karen Salt, Deputy Director of Research Culture and Environment, UK Research and Innovation: "And the minute we start to think about it as practice, we can begin to actually practice it properly."
