Citizen Science Collaboration Grant

Updated Guidance for applicants regarding Project Partner and Collaborator costs
7 August 2020

1. Applicants to this scheme can now claim directly incurred, project-related costs of their Project Partners and Collaborators.

2. This includes salary costs for time spent on the project (excluding national insurance contributions), travel and subsistence, venue hire, and any other costs that are deemed eligible under the Directly Incurred Costs heading.

3. All applicants must abide by the rules set out in the Justification of Resources Guidance.

4. This change has been made to allow a wider variety of partners to take part in projects, particularly charitable and community organisations that could not take part without adequate renumeration.

If you have any questions or queries about this change, please contact us at publicengagement@ukri.org.
