Decarbonising Heating and Cooling 2

Opportunity status:	Open
Funders:	Engineering and Physical Sciences Research Council (EPSRC) , Natural Environment Research Council (NERC)
Funding type:	Grant
Total fund:	£12,000,000
Award range:	£500,000 - £1,500,000
Publication date:	28 September 2020
Opening date:	15 June 2020
Closing date:	1 October 2020 16:00 UK time

Last updated: 28 September 2020

[Start application](#)

This call is to fund proposals to support the goal of the decarbonisation of heating and/or cooling. Proposals must be at least 50% within the remit of EPSRC or at least 50% within the remit of NERC.

Proposals are invited and encouraged to include research that spans the remit of both EPSRC and NERC, but this is not a requirement (and may not be appropriate to all topics within the heating and cooling challenge).

However, proposals must be interdisciplinary in that ALL proposals must include an economic and/or social science component.

Proposals must be for a research grant.

The research proposed must clearly address decarbonising heating, decarbonising cooling or decarbonising both heating and cooling. Proposals that do not clearly address decarbonising heating, decarbonising cooling or decarbonising both heating and cooling as the main focus will be rejected as out of remit for the call.

It is expected that the funding available for this call is approximately £12 million. Proposals should be for a maximum of £1.5 million and for a minimum of £500K. Proposals should be for 36 to 48 months duration.

Proposals may come from consortia or individual institutions and may address individual or multiple themes.

Please note an Intent to Submit must be submitted by 16:00 23 July 2020 in order to be able to submit a Full Proposal to this call.

Only Intent to Submits completed on the online form (below the Resources box) will be accepted. The Intention to Submit text file in Resources box is for information only.
