

New Zealand Partnering Awards

BBSRC's support for facilitating international collaboration with New Zealand

BBSRC's International Relations Unit (IRU) seeks to enhance BBSRC's influence and involvement at the forefront of international science, through taking advantage of international funding opportunities in the interests of BBSRC's scientific community and capitalising on international links, both at policy and scientific levels.

The New Zealand Partnering Awards have been established by BBSRC to specifically support UK-New Zealand collaborative activity. New Zealand Partnering Awards provide resources to leading BBSRC-funded researchers and groups, so that they are able to establish long-term relationships with New Zealand scientists in areas of research that are of direct relevance to BBSRC's current scientific strategy.

The first annual call for the New Zealand Partnering Awards scheme was announced by BBSRC in 2019. Awards of up to £50,000, covering a four-year period, have been awarded. This year, BBSRC has funded 2 New Zealand Partnering Awards, providing a financial contribution of approximately £92K.

Funding from New Zealand Partnering Awards can be used to support exchanges of personnel and to access facilities and workshops, although no prescribed mechanisms have been set concerning how the award should be used. However, priority is given to proposals that aim to provide exchange opportunities to early career researchers and access facilities and expertise not currently available in the UK.

The expectation is that New Zealand Partnering Awards will enable researchers to establish collaborations that will lead to the submission of joint research proposals, either through UKRI or other funding organisations in the future.

A list of proposals that have been awarded by BBSRC in 2019 are shown below.
