Freedom of Information request: 2019/0139 AH

Thank you for your freedom of information request received on the 15th of June 2019 in which you requested the following:

Your request:

Please could you provide me with a breakdown of the number, length and value of arts and humanities PhD studentships awarded by the UKRI (either broken down by research partnership or aggregated as a whole for the UKRI)? In addition, for each award, I would like to see the subject of the award (e.g. Physics etc.), completion time (from the date of the award), along with the length of any periods of interruption.

Our response

I can confirm UK Research and Innovation hold information relevant to your request. Please see the information below and attached.

In regard to your request for *'a breakdown of the number, length and value of arts and humanities PhD studentships awarded by the UKRI (either broken down by research partnership or aggregated as a whole for the UKRI)'*, it has been assumed that 'research partnership' means AHRC.

If you are able to indicate the period over which this data is required i.e. how many academic years and which years should be included, we would be happy to provide this. We can provide numbers of doctoral students for the last 5 years as a starting point, however there is some indication of numbers in the spreadsheet provided which may address your question.

Under current AHRC policy, full-time studentship awards can be a minimum of 18 months and a maximum of four years. The duration (period from start date to end date) and/or the funded period can change during the period of the award under certain circumstances e.g. due to a suspension, additional funded time for maternity leave, or a change from full-time to part-time study. Students who study part-time are eligible for an award, but a part-time award should not be less than 50% of full-time: the award duration is amended accordingly e.g. an award may be for six years' part-time.

Most studentships are awarded through Training Grants, these are awards to universities or consortia of universities to allow them to support several students each year. The value of the individual student awards is determined by the Training Grant award holders.

The funding that AHRC provides covers several headings:

- Stipend – UKRI agrees a minimum doctoral stipend each year, which is published on the [UKRI website](#)¹.
- Fees – UKRI sets an indicative fee level which is on the same page.

For previous stipend (maintenance) and fee rates – see the [AHRC web page](#)².

- Research Training Support Grant – for current students this is £200 per student, per annum but this is allocated by the Training Grant so the amount any individual student will receive will vary.

In addition, the Training Grants have the flexibility to provide additional funding to meet student training and development needs and funding to cover costs of cohort level activities. We also provide additional funding under the Disabled Students Allowance.

Full details are included in the [Training Grant Funding Guide](#)³ – Section 2 covers Funding.

In regard to your request for: *‘the subject of the award (e.g. Physics etc.), completion time (from the date of the award), along with the length of any periods of interruption.’*, please find attached document “FOI request 2019.0139 Data”.

Please note the following in relation to the data provided within this spreadsheet:

Subject – we have provided the primary classification assigned to the award by the award holder.

Completion time – we do not have completion dates but have provided the ‘awarded date’ which has been used to calculate the completion time. The start date has been taken as the funding start date. In some cases there is no ‘awarded date’ recorded: this does not mean that the PhD was not awarded, it may mean that the university did not update the student’s record. Data is provided for students who started their award between 2009 and 2014, inclusive. This is on the assumption of a three-year award, one year to submit the thesis, plus time to completion.

Periods of interruption – this has been calculated based on changes to the funding end date. This methodology will not show if there have been multiple interruptions, only the total period of interruption. We have excluded end date changes which have resulted from a change of status e.g. change from full-time to part-time, whenever possible, though noting that a status change may not be clear from the student’s record.

In some cases, there has been both an interruption and a change of status. Interruptions may be taken for a range of reasons, for example, maternity or paternity leave, personal or health reasons or to take up placement or scholarship opportunities. AHRC records only cover periods which fall under the conditions of the AHRC studentship award (these are referred to as ‘extensions’ and ‘suspensions’ in the UKRI and AHRC documentation).

If you have any queries regarding our response or you are unhappy with the outcome of your request and wish to seek a review of the decision, please contact:
