Horizon Europe guarantee guidance

On 29 November 2021, the government announced a new scheme that guarantees funding for successful applicants to the first wave of Horizon Europe grant awards regardless of the outcome of the UK's efforts to associate to Horizon Europe.

The UK government has stated that its priority remains association to Horizon Europe, as both the UK and the EU agreed under the Trade and Cooperation Agreement last year, and that it stands ready to formalise UK association. However, ongoing delays in this process have led to uncertainty for researchers, businesses and innovators based in the UK.

The guarantee is a short-term measure intended to address the delays in the formalisation of the UK's association to Horizon Europe. To provide reassurance, the government has guaranteed funding for the first two waves of eligible, successful applicants to Horizon Europe if they are unable to sign their grant agreements with the EU.

Please note: the scope of the funding guarantee has now been expanded. Please see the first and second wave of calls now in scope in the Annex to this document.

Funding routes for successful applicants to calls in the second wave and 2022 EIT KICs will be opened from May 2022. Further guidance on how to apply for this funding will be published in due course.

If you have any queries about the scope of the guarantee please contact us at EUGrantsFunding@ukri.org.

From 17 March 2022, we are open to applications for ERC Starting Grants guarantee funding as part of the first wave of calls. For detailed guidance on how to apply, please see the [Horizon Europe guarantee notice and guidance page](#) once the call opens.

Funding overview

The guarantee funding is delivered through UK Research and Innovation (UKRI) and this notice provides guidance on eligibility, scope and what you need to do to receive funding if eligible.

As stated in '[Questions and Answers on the UK's Participation in Horizon Europe](#)' (European Commission), UK entities are already eligible to apply ahead of the UK's formal association to Horizon Europe while the UK is in the process of associating. The UK government continues to encourage UK researchers to take advantage of this opportunity.

However, UKRI and the UK government are aware that successful UK applicants may be unable to access funding from the EU if the formalisation process of the UK's

membership of Horizon Europe has not been completed by the time they are required to sign a grant agreement with the EU.

In this scenario, for the first two waves of grant awards (calls listed in the Annex to this guidance), the UK government has committed to provide funding for all successful eligible UK bids. Funding will be made available in pounds sterling.

The funding guarantee will be delivered by UKRI with payments made quarterly in arrears as standard, with the exception of projects carried out under the European Institute of Innovation and Technology (EIT) Knowledge and Innovation Communities (KICs) 2021 Business Plans, where UK entities have already incurred costs in 2021. These KICs will be funded through two payments, one on registration of the project and a second payment once assurance checks on final project spend have been completed.

Scope of the guarantee

This guarantee is intended to support the first two waves (full call list in Annex) of Horizon Europe awardees for excellent science, research and innovation in the event that they cannot sign a grant agreement with the European Commission or delegated party because the UK's association has not been formalised in time, and therefore cannot receive funding.

Both for mono-beneficiary and multi-beneficiary grants, this funding will be provided for the lifetime of the grant, subject to UKRI terms and conditions.

The guarantee has now been extended to include those calls for which the last legal date for signing grant agreements is expected to pass before 31 December 2022. For the list of calls covered by the guarantee, please see the Annex to this document, which includes the first wave of calls announced in December 2021 and the second wave of calls announced in March 2022.

The UK government has stated that it continues to monitor the situation closely and may consider whether it is appropriate to change the scope of the guarantee, in which case it will provide updated guidance.

EIT-KICs

The guarantee also covers the costs of EIT-eligible activities delivered by UK participants of the KICs that would otherwise have been covered by grant funding awarded by EIT. The guarantee applies retrospectively for EIT-eligible activities where relevant costs were incurred in calendar year 2021.

Additionally, the guarantee also covers costs incurred in 2022 for EIT-KIC activities delivered by UK participants where these costs would otherwise have been covered by grant funding awarded by EIT. For the costs of these activities, access to funding under the guarantee will open in May 2022. This part of the guarantee will cover costs incurred in the calendar year 2022 only.

For both 2021 and 2022, the guarantee only replaces grant funding that would have been awarded by EIT. It does not replace funding from non-EIT sources or loans and does not cover activities that involve a 'success fee' on completion. In addition, it does not cover funding under arrangements that place share-transfer or other equity conditions on UK partners. For such cases, relevant KICs would need to remove these conditions for funding to be capable of falling within the scope of the guarantee.

COST Actions

The UK remains a full member of the European Co-operation on Science and Technology (COST) Association and, subject to its usual rules, UK applicants are eligible to participate and receive funding in its interdisciplinary research networks (COST Actions) irrespective of the UK's association to Horizon Europe. As a result, UK participants in COST Actions are eligible for reimbursements via COST in the usual way and COST Actions are therefore not covered by this guarantee.

Eligibility

Successful UK applicants will be eligible to register with UKRI for the Horizon Europe guarantee if:

- They are a UK-based organisation and a member of a consortium which has received notification of a successful proposal evaluated under a Horizon Europe call under the first or second waves (as listed in the Annex) and which meets the required European Commission eligibility criteria to deliver the project.
 - or
 - They are a UK-based organisation or researcher who has received notification of a successful proposal evaluated under a mono-beneficiary Horizon Europe call under the first or second waves (as listed in the Annex).
 - or
 - They are a researcher who has received notification of a successful ERC proposal with a UK host institution for an ERC call under the first or second waves.
 - or
 - They are a UK-based organisation which has carried out a project under a KIC 2021 Business Plan and they have incurred relevant costs during the 2021 calendar year, or they carry out a project included in a KIC 2022 Business Plan and they incur relevant costs during the 2022 calendar year.
- and**
- They are ineligible to receive funding from Horizon Europe because they were unable to sign the grant agreement as an applicant from an Associated Country due to the UK's association status not being formalised in time (as per guidance issued by the European Commission: ['Questions and Answers on the UK's Participation in Horizon Europe'](#)).
 - If the UK's association had been formalised in time, they would have been able to sign the grant agreement as an applicant from an Associated Country and would have received funding from Horizon Europe or a delegated party.

The requirements set out elsewhere in this document will also need to be met, and additional terms and conditions will apply, including (without limitation) onboarding checks, award holder reporting requirements and the application of currency exchange rates.

What do I need to do to receive funding if eligible?

In order to receive funding through the guarantee, your grant details will need to be submitted to UKRI systems, in order for UKRI to provide you with a UK grant. For most grant types, registration will be via Innovate UK's [Innovation Funding Service](#) (IFS), while funding of ERC and MSCA grants will be provided via the [Joint Electronic Submissions](#) (Je-S) system.

For the first wave of the guarantee UKRI is currently opening funding routes for specific calls once it is clear that a European Commission grant agreement will not be signed for that call, allowing eligible, successful UK applicants to obtain a UKRI grant. These windows are announced for each call. For multi-beneficiary grants for calls in the second wave the system will remain open, but we will only accept and process applications including the consortium's signed grant agreement listing the UK partner as an Associated Partner.

Guidance for how to apply for wave 1 EIC and 2021 EIT KICs guarantee funding, as well as ERC Starting Grants guarantee funding, may be found on the [Horizon Europe guarantee notice and guidance page](#).

The funding routes for calls covered in the second wave of the guarantee and 2022 EIT KICs will be opened from May. Further guidance on how to apply for this funding will be published in due course.

Since applications will have been evaluated through the European Commission's trusted peer review systems no further application quality assessment will be undertaken by UKRI.

For EIT-KICs, UKRI systems were opened for 2021 grants in February 2022. You will need to provide additional supporting information from your KIC, details of which are given in the Annex to this document along with full applicant guidance. For 2022 grants, UKRI systems will open in May 2022.

Once registration of an eligible Horizon Europe grant with UKRI is complete, awardees will receive an offer of funding from UKRI. Payments will be made directly to each UK beneficiary organisation.

Terms of the guarantee

As set out above, in addition to the provisions of this document, further terms and conditions will apply to the Horizon Europe guarantee, including (without limitation) onboarding checks, award holder reporting requirements and the application of currency exchange rates. Further details may be found in the Q&A below and the

Annex on how to apply for the funding. UKRI reserves the right to modify any of the terms and conditions of the Horizon Europe guarantee.

Technical questions and answers

Questions regarding the guarantee announcement

1. Should I still apply for Horizon Europe calls that are outside of the scope of the guarantee?

Yes. As stated in '[Questions and Answers on the UK's Participation in Horizon Europe](#)' (European Commission), UK entities are already eligible to apply ahead of the UK's formal association to Horizon Europe. The UK government states that it is committed to securing association and continues to encourage UK researchers to take advantage of this opportunity.

2. What funding is covered on successful projects?

100% of the applied-for EU eligible costs will be paid, subject to exchange rate and any changes in tasks undertaken by the UK participants in the process of finalising the EU grant agreement.

3. Are UK participants still able to lead consortia?

The European Commission has published clear guidance that during the application process UK participants should be treated as if the UK were already associated to Horizon Europe. This means that they can apply for funding and participate in and lead consortia for collaborative projects. If the European Commission formalises the UK's association before a grant agreement must be signed, then UK participants on that grant will be funded by the European Commission and will be able to fulfil their role as lead or participant as set out in their proposal.

While Horizon Europe regulations generally require a participant to be based in a Member State or an Associated Country in order to lead a project, UK participants in successful consortia should follow the guidance of the European Commission on eligibility, project roles and signing the grant agreement.

4. What happens to projects that have already been submitted by UK participants while they are being treated as an Associated Country if there is an extended delay to the UK formalising their association?

As stated in '[Questions and answers on the UK's participation in Horizon Europe](#)' (European Commission), UK entities are already eligible to apply ahead of the UK's formal association to Horizon Europe, and the UK Government expect the European Commission to continue evaluating these applications.

If UK applicants to the first or second wave of calls reach a point where they are required to sign the grant agreement before the EU has formalised the UK's association, then the process to follow will depend on the nature of the European grant applied for:

Consortium-style grants

For consortium-style grants within the first or second wave of calls, the guarantee is in place to fund eligible UK participants' roles in these projects. The European Commission may require a UK partner to change the status of their participation to an 'Associated Partner'.

Associated Partners implement action tasks without receiving EU funding and do not sign the grant agreement. While Associated Partners are not required to have a capital or legal link to a specific beneficiary, the other beneficiaries in the consortium take on the responsibility (through consortium agreements or contractual arrangements) to ensure proper implementation of the Associated Partners' elements of the project, as well as compliance with specific obligations of the grant agreement which are extended to Associated Partners. The UK partner will be required to provide proof of the successful grant to UKRI and undertake the steps outlined in this document, and UKRI would provide the UK partner's share of the funding under the guarantee.

Mono-beneficiary-style grants

For mono-beneficiary-style grants within the guaranteed list of calls, an eligible UK entity will provide proof of success in the evaluation process to UKRI and undertake the steps outlined in this document, and UKRI will provide the entity with funding under the guarantee.

5. What happens if the European Commission stops evaluating applications for my call?

While the UK is in the process of concluding its association status, the European Commission allows entities in the UK to apply for Horizon Europe funding as if the UK were an Associated Country, which the European Commission has made clear in '[Questions and answers on the UK's participation in Horizon Europe](#)' (European Commission). It states that: "The first calls for proposals are expected to be published before UK association enters into force. The General Annexes attached to the main Horizon Europe work programme (2020-2021), as well as the ERC and EIC work programmes (to which the General Annexes will apply once the latter are adopted), will ensure that UK applicants are treated as if the UK is an Associated Country throughout the process, from admissibility and eligibility to evaluation, up until the signature of grant agreements. However, grant agreements can only be signed once the association has come into force."

6. If successful UK applicants have to become Associated Partners in their project consortium, do they still sign a grant agreement with the European Commission or delegated party?

Associated Partners implement action tasks without receiving EU funding and do not sign the grant agreement. While Associated Partners are not required to have a capital or legal link to a specific beneficiary, the other beneficiaries in the consortium take on the responsibility (through consortium agreements or contractual arrangements) to ensure proper implementation of the Associated Partners' elements of the project, as well as compliance with specific obligations of the grant agreement which are extended to Associated Partners.

7. For calls open to Third Countries, will UK participants funded through the guarantee be required to provide the European Commission with reports against deliverables in the grant agreement?

If the EU has not formalised the UK's association at the point where the grant agreement must be signed, then the status of the UK participants on the grant would change to 'Associated Partner'. Associated Partners implement action tasks without receiving EU funding and do not sign the grant agreement, meaning that they have no direct obligation to provide reports against deliverables. The beneficiaries in the consortium will have responsibility for submitting deliverables to the EU and, depending on the tasks to be delivered by the Associated Partner, would agree the Associated Partner's expected contribution to reporting through consortium agreements or contractual arrangements.

8. What post-award reporting will be required for the UKRI guarantee grant?

For grants hosted by Innovate UK's IFS system, except for 2021 KICs grants, a Monitoring Officer will be appointed to the project in line with standard practice. The Monitoring Officer may request to meet with the project team at regular intervals, typically quarterly, to monitor the progress of the UK's partner's contribution to the project against the stated deliverables. We will take into account reports provided to the EU project consortium wherever available to minimise duplication of reporting requirements. A final report of the UK partner's contribution to the project will also be required at the end of the project.

For 2021 KICs grants, financial checks only will be carried out to verify costs incurred in 2021. See above, Questions 23 and 24 below and the separate guidance for further details.

For grants hosted on Je-S grant holders will be expected to report research outcomes through [Researchfish](#). Grants will probably fall under the regular programme of assurance checks carried out on Research Council grants; however, we reserve the right to carry out additional monitoring as required.

9. What will happen to awards where the eligibility of the consortium is compromised in the event that the UK is unable to associate to Horizon?

The minimum eligibility requirements for a consortium, including the number of Member State or Associated Country participants, are conditions set out by the European Commission in the legal agreements of Horizon Europe and are specific to the type of call. The eligibility of any individual consortium is therefore a decision for the European Commission to make, and projects should follow guidance from the European Commission.

10. How can UK participants in successful projects submit their funding request to UKRI?

Procedures will vary depending on the call and will make use of existing systems and processes used by UKRI. For most grant types, registration will be via Innovate UK's [Innovation Funding Service](#) (IFS). Funding of ERC and MSCA Grants will generally be provided via the [Joint Electronic Submissions](#) (Je-S) system. Further details may be found in the [Horizon Europe guarantee notice and guidance page](#) once the call opens.

11. What exchange rate will be accepted to convert the EUR grant to GBP?

The Euro value of the grant must be converted to pounds sterling and the UKRI grant under the guarantee will be for a pound sterling value. A maximum exchange rate of £1:€1.160354 will be accepted, which reflects the average exchange rate between January 2021 (at the start of the Horizon Europe programme) and October 2021 (following the closure of the last call which is in scope for the first wave). Payments will then be made on the basis of the GBP grant value.

UKRI may change the GBP grant value in response to significant fluctuations in international exchange rates by applying an exchange rate that is different to the one it initially applied, but it shall not:

- i. do so more frequently than once in a 12-month period; or
- ii. apply any such change retrospectively to affect payments already made.

12. What do I need to do to prepare?

In order to receive funding through the guarantee, grant details will need to be submitted to UKRI systems. For most grant types, registration will be via Innovate UK's [Innovation Funding Service](#) (IFS). Funding of ERC and MSCA grants will generally be provided via the [Joint Electronic Submissions](#) (Je-S) system. Further details and the application information required are given in the [Horizon Europe guarantee notice and guidance page](#).

13. Will proposals submitted to UKRI be re-evaluated/reassessed?

Since applications will have been evaluated through the European Commission's trusted peer review systems, no further application quality assessment will be undertaken by UKRI. Organisational validation and due diligence checks will be carried out in line with UKRI business as usual processes.

14. How will grant payments via UKRI be made?

Grants will be funded in pounds sterling by profiled payments based on UKRI standard processes. UKRI will typically make payments quarterly in arrears.

15. What happens to my grant if the UK formally associates to Horizon Europe after the UKRI guarantee has been applied to my project?

UK participants who have received a UKRI grant under the guarantee will remain on the UKRI grant for the lifetime of the grant, subject to UKRI terms and conditions.

16. Will UK-based Affiliated Entities be covered by the guarantee?

Yes, costs for UK-based Affiliated Entities in consortia will be covered by the guarantee in the same way as costs for beneficiaries. The EU will treat Affiliated Entities to EC/MS based grants as Associated Partners if the UK doesn't associate in time, and they will be covered by the guarantee.

Questions for specific elements of the programme

17. Are Co-funded European Partnerships within the scope of the guarantee?

UKRI is aware that there has been a number of calls to form co-funded European Partnerships. Further information on the coverage of these European Partnerships will be provided shortly. Please continue to review this guidance for updates.

18. Are calls run by Joint Undertakings within the scope of the guarantee?

Further information on the coverage of calls launched by Joint Undertakings will be provided shortly. Please continue to review this guidance for updates.

19. Are ERC grants within the scope of the guarantee?

Yes, the guarantee will provide funding for all eligible successful awardees of ERC Grants that fall within the first or second wave. This guarantee will allow awardees to receive the full value of their funding and continue their research in the UK.

Awardees do not need to move abroad to an EU Member State or to an Associated Country to Horizon Europe to access this funding.

20. Will my ERC guarantee grant be portable?

Grants funded through the UK guarantee will be portable within the UK according to UKRI standard terms and conditions. Awardees of ERC Starting, Consolidator and Advanced grants through calls included in the first or second wave of the guarantee who applied to be hosted outside the UK may carry out their project in the UK and be funded through the guarantee, subject to two conditions:

- i. They have not signed an ERC grant agreement to be hosted elsewhere.
- ii. They can demonstrate through submission of a host institution letter that a UK research organisation is prepared to host them for the lifetime of the grant.

Potential applicants in this situation are advised to contact us at EUGrantsFunding@ukri.org before applying.

21. Are EIC Accelerator and single applicant EIC Transition awards within scope for the guarantee?

Yes, eligible successful UK applicants to the initial rounds of the EIC Accelerator and EIC Transition (2021) calls are included within the first wave of Horizon Europe calls and thus covered by the Horizon Europe guarantee. If the awardee is unable to proceed with signing the grant agreement for their EIC award, proof of success in the EC evaluation process will need to be submitted to UKRI which will provide funding under the guarantee.

22. Are EIC Pathfinder awards and multi-beneficiary EIC Transition awards within scope for the guarantee?

Yes, funding for eligible UK applicants involved in eligible consortia successfully evaluated under the first EIC Pathfinder or EIC Transition (2021) calls, who are unable to proceed with signing a grant agreement with the European Commission, is within scope for the guarantee. The final signed grant agreement, listing the UK partner as an Associated Partner, will need to be submitted to UKRI, which will provide funding under the guarantee to enable continued participation in the project.

23. I was unable to sign a grant agreement and/or receive funds for an approved EIT-KIC project during 2021 and have incurred costs 'at risk'. How quickly will I receive the guarantee funding?

You can now register your project and provide supporting documents. Once your submission has been validated you will receive a payment of 50% of your claim upfront. You will be able to claim the remainder of the funding once you have

completed financial reporting to your KIC and they have verified your incurred costs. You will need to submit this verification to UKRI alongside your claim to receive the balance. Full details of how to register your project are given in the Annex to this document.

24. What supporting documents will I need to provide to UKRI when registering for funding under the guarantee for EIT-KIC activities carried out in 2021?

You will need to submit the following supporting documents:

- **A letter from your KIC confirming the details of your project/activities.** A template letter that must be used for this purpose has been provided to each of the KICs by UKRI. Your KIC will fill in the template and give you a signed copy to submit when registering your project. (For information, you can see the [template letter](#) and you can download it if you need to share it with your KIC).
- **A 2021 grant agreement between you and the KIC and/or an alternative proof of success.** Suitable alternative evidence could include an official letter or email from the KIC confirming that your project was accepted as part of the 2021 business plan for your KIC.
- **If your KIC has removed ‘success fee’, share-transfer or other equity conditions in order for your claim to be within scope of the guarantee,** you will need to submit confirmation of the details of this from your KIC.

25. Does the guarantee cover EIT-KIC activities where costs are being incurred in 2022?

Eligible UK participants involved in EIT-KIC activities with costs being incurred in 2022 are covered by the guarantee, provided that Third Country participation is allowed.

This covers the costs of EIT-eligible activities delivered by UK participants where these activities have been included in 2022 KIC Business Plans and the costs would otherwise have been covered by grant funding awarded by EIT. For the costs of these activities, access to funding under the guarantee will open in May 2022. This part of the guarantee will cover costs incurred in the calendar year 2022 only.

26. I am participating in a multi-year EIT-KIC project, how will guarantee funding be administered?

In line with EIT-KIC processes, the guarantee will cover costs by calendar year. For costs that were incurred during 2021, you can now register your project along with supporting documents in UKRI systems. For costs incurred in 2022, you will be able to register your project in May 2022. The guarantee does not extend to costs incurred in 2023. Full details of how to claim for 2022 costs will be published in due course.

27. I received ‘exceptional status’ from EIT for my participation in an EIT-KIC project. Do I need to claim anything under the guarantee?

No, the guarantee only covers projects that have not been able to receive funding from the EU. You should continue with your project as normal and receive funds from EIT.

General definitions and information on Associated Partner status

28. What is an 'Associated Country'?

An Associated Country is a country that is not a Member State of the EU but has a formal agreement with the EU detailing the terms of its association to a European framework programme. Sixteen countries associated to Horizon 2020, and it is likely a similar number will associate to Horizon Europe. Entities from associated countries are eligible to participate in most elements of the programme under the same conditions as entities from Member States, with a few limited exceptions.

29. What is a 'Third Country' and 'Third Country participation'?

All countries that are neither an EU Member State nor an Associated Country are referred to as non-associated 'Third Countries'. Non-associated Third Countries have no agreements to associate to the EU Framework Programme. Participants from non-associated Third Countries are able to participate in some areas of the programme, predominantly in collaborative calls as Associated Partners, although they are not generally eligible to receive funding from the programme unless this is explicitly mentioned as an exception in the call documentation.

30. What is an 'Associated Partner'?

Associated Partners implement action tasks without receiving EU funding. They cannot lead a consortium, and do not sign the grant agreement. One example of this is where legal entities participate in a Horizon Europe grant but are not based in a Member State or Associated Country. While Associated Partners are not required to have a capital or legal link to a specific beneficiary, the other beneficiaries in the consortium take on the responsibility (through consortium agreements or contractual arrangements) to ensure proper implementation of the Associated Partners' elements of the project, as well as compliance with specific obligations of the grant agreement that are extended to Associated Partners.

31. What is the last legal signature date?

The 'last legal date for signing the grant agreement' refers to Article 31 of the EU's [Regulation Establishing Horizon Europe](#) document:

"The following periods shall apply [...] for signing grant agreements with applicants, a maximum period of eight months from the final date for submission of complete proposals".

This is the last date by which the Commission must sign the Grant Agreement. The Commission may choose to set a Grant Signature Date that is earlier than this last legal date, but they may not postpone beyond it. This applies to all calls except ERC and MSCA, for which the dates provided in the Work Programmes are used.

32. When do I become an Associated Partner?

Following successful evaluation, the Commission will notify you of your success and invite you to begin the process of grant agreement signature. If the UK has not completed association to Horizon Europe when the grant agreement signature is imminent, your organisation could participate in the project as an Associated Partner

(i.e., no longer classed as a beneficiary) as long as the topic you are responding to allows Third Country participation.

You should notify your coordinator and the Commission project officer that you would like to participate as an Associated Partner. The Commission will acknowledge this, and you will no longer be part of the grant agreement signature process. However, the coordinator should keep you up to date on the progress of the grant agreement signature.

33. How do I become an Associated Partner?

As an Associated Partner you do not sign the grant agreement, but you do sign the consortium agreement. You will need to accept certain Articles from the grant agreement (see the paragraph below) which should be inserted into the consortium agreement.

The grant agreement Articles that apply to Associated Partners are as follows:

- Article 11 (proper implementation)
- Article 12 (conflict of interests)
- Article 13 (confidentiality and security)
- Article 14 (ethics)
- Article 17.2 (visibility)
- Article 18 (specific rules for carrying out action)
- Article 19 (information)
- Article 20 (record- keeping).

You will also need to accept that the bodies mentioned in Article 25 can exercise their rights towards you.

The [Model Grant Agreement](#) gives further details at Article 9.1 (p39-40)

You should ask the coordinator to insert the provisions of Article 9.1 into the consortium agreement and say that they apply to you. Note that any financial provisions in the consortium agreement do not apply to you and you should ask the coordinator to exclude you from those provisions.

Many projects use the [DESCA Model Consortium Agreement](#) although your coordinator may have a different format.

The consortium agreement will be signed prior to the signature of the grant agreement. Once the grant agreement is signed the project can begin.
