Dear UKRI EU Grants Funding Team,

I am providing this letter to the UK partner detailed below so that they can submit it as part of their application to UKRI to access the UK Government's Horizon Europe Guarantee to cover the 2021 EIT contribution that they would have received had the UK been associated to Horizon Europe.

- Name of the UK partner organisation:

- Title of project (or "2021 [Name of KIC] activities" if covering multiple activities):

- Grant/Reference Number:

- Name of awarding KIC:

- Value of final anticipated EIT contribution to the UK partner for 2021 (in €) had the UK been associated to Horizon Europe:

- If available, a breakdown of budget by cost heading can be annexed

This letter confirms the following:

- The UK partner named above is a genuine KIC partner who would have received EIT grant funding in 2021 had the UK been associated to Horizon Europe
- Their activities progressed in 2021 (i.e. they have not deferred to 2022, or withdrawn their involvement completely)
- They have not received grant funding through the KIC or other routes for these activities (e.g. they have not been given 'exceptional status' by EIT to receive funding)
- The funding is purely for the UK partner's activities, not those of partners in other countries
- The activities would have been funded as a grant and not a loan
- The activities do not involve a 'success fee' on completion or have arrangements that place share-transfer or other equity conditions on the UK partner. If these arrangements have been in place, it is confirmed that these conditions have been removed for the 2021 contribution being requested from the UK Government's guarantee.

Additionally, this letter confirms that the KIC will be happy to provide supporting documentation, via the UK partner, once the partner has completed their final financial reporting to the KIC later in 2022 (e.g. a confirmation that the necessary checks that would normally be carried out to validate incurred costs have been completed, along with a final value of the contribution that would have come from EIT for 2021 had the UK been associated to Horizon Europe).

Yours sincerely,
