

Force of nature: sustainable solutions for net zero, economy and society

NERC science enables government, business and society to protect nature effectively, which strengthens our economic security, propels our journey to net zero, and benefits our health and wellbeing. Building on this strong impact, NERC is leading investments that will drive a shift to a green, low-carbon economy, that embeds environmental considerations into our businesses, financial services, and nature conservation.

Nature: key facts

- Value of nature to the UK economy: £1.2 trillion+
- 55% of global GDP supported by nature

Long-term NERC investment in research, innovation, infrastructure, training and partnerships delivering:
