## 2022/23 strategic Longer and Larger (sLoLa) grants: frontier bioscience

### Webinar

3 May 2022, 10:00

12 May 2022, 14:00

***Welcome: we will be starting shortly***

<https://www.ukri.org/opportunity/strategic-longer-and-larger-grants-slola-frontier-bioscience-2022-to-2023/>

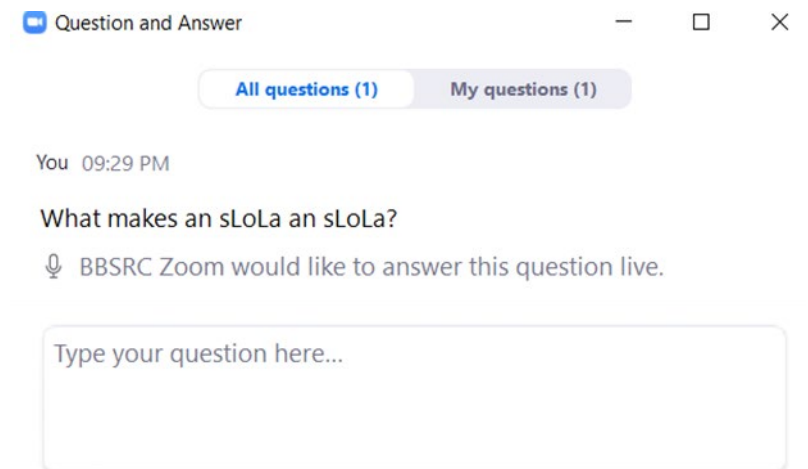

# Technical Notes

- By default, attendees are muted and video is turned off.
- Turning off VPN may improve connectivity
- Submit any questions that arise as the webinar progresses via the **Q&A** function
- Please only use the chat function for any technical assistance during the webinar.
  - Bear in mind your zoom name will be visible in the chat.

# Questions

- You can submit questions during the webinar progresses via the **Q&A** function
- Questions can also be submitted to [bbsrc.lolagrants@bbsrc.ukri.org](mailto:bbsrc.lolagrants@bbsrc.ukri.org) at any time. A team member will reply by email ASAP or we can arrange to speak.
- Detailed questions about a specific proposal which are unlikely to be relevant to other attendees should also be sent to the inbox.
- Questions about the Je-S system should be emailed directly to [JeSHelp@je-s.ukri.org](mailto:JeSHelp@je-s.ukri.org)

Question and Answer

All questions (1) My questions (1)

You 09:29 PM

What makes an sLoLa an sLoLa?

BBSRC Zoom would like to answer this question live.

Type your question here...

# Welcome and Introductions

- Panellists

- Michael Connolly: Research and Innovation Funding Delivery
- Laurie O'Neill: Research and Innovation Funding Delivery
- Helen Smith: Research and Innovation Funding Delivery
- Kyle Martin: Research Strategy and Programmes
- Tom Pearson: Research Strategy and Programmes
- Peter Burlinson: Research Strategy and Programmes

- Single point of contact

[bbsrc.lolagrants@bbsrc.ukri.org](mailto:bbsrc.lolagrants@bbsrc.ukri.org)

# Purpose of the Webinar

- Provide an overview of the 2022/23 sLoLa call
- Highlight key expectations
- Ensure applications are appropriately targeted
- Introduce the Team Résumé for Research and Innovation

# Agenda

- Overview and the scope of the call
- Some pointers on what makes a good sLoLa proposal
- Application and assessment process
- Eligibility and some FAQs
- Open Q&A

# Overview: frontier bioscience and BBSRC strategy

## Understanding the rules of life

Promoting creative, curiosity-driven frontier bioscience to address fundamental questions in biology

### Advancing the frontiers of bioscience discovery

Understanding the rules of life

Transformative technologies

### Tackling strategic challenges

Bioscience for sustainable agriculture and food

Bioscience for renewable resources and clean growth

Bioscience for an integrated understanding of health

### Building strong foundations

People and talent

Infrastructure

Collaboration, partnerships and knowledge exchange

<https://www.ukri.org/what-we-offer/browse-our-areas-of-investment-and-support/frontier-bioscience-understanding-the-rules-of-life/>

# Fit to scientific scope: some key indicators

- A significant fundamental bioscience question/ goal
- Potential to deliver a step change in understanding
- Often multidisciplinary
- Likely to require innovative approaches and methods
- **Broad potential importance** to bioscience beyond immediate field, but end-user applications not necessarily identifiable at this stage.

Projects awarded in 2021

<https://www.ukri.org/news/bbsrc-backs-frontier-research-with-17m-investment-in-team-science/>

# Team science

- An opportunity to bring together multiple researchers to address a complex challenge
  - Diversity of disciplines, institutions, perspectives...
- Think carefully about your **research team** and whether it is the best team to deliver the proposed programme of work in a **national context**
  - Likely multi-investigator, multi-institution, multi-disciplinary
  - Bringing together researchers from range of backgrounds
  - Equality, Diversity and Inclusion should be considered
- Complementarity and ‘added value’ of each team member should be clear
  - Covering all experimental, analytical, managerial and leadership requirements

# Team science leadership

- Principal Investigators are **not required** to have held similar sized award before
- The sLoLa team (PI and Co-Is **collectively**) should demonstrate competency to lead complex, multi-site project
- Plans for mentoring or shared responsibilities (e.g. Co-PIs) can be highlighted in Team Résumé for Research and Innovation

# What makes an sLoLa an sLoLa?

- The sLoLa mechanism is designed to support **large, integrated programs of research over a longer timeframe**
- Must demonstrate that the work **requires** a single larger scale award to be carried out
  - Clear synergy and interdependency between work packages
  - Project summary diagram in Case for Support
  - Integration of data and results is key
- **Full justification** for every element of research programme

# Strategic approach

- BBSRC's broader portfolio will be considered in making decisions
  - Any significant overlaps with existing large investments
  - Proposals should be distinctive and outline how they fit within/ enhance UK bioscience
- Proposals **must** be focused primarily on important fundamental science advancement
  - Proposals will be excluded if primary aim is to solve an applied challenge
- Proposals must be within our remit
  - Contact us if unsure

# The 2022/23 sLoLa call

- **£16M** available in total for projects each >£2M
  - Our budget is limited (3-5 projects)
- Process is designed to identify and prioritise the most robust proposals of the highest quality at each step
  - Conduct peer review effectively and efficiently
  - Reviewer, committee member and BBSRC office resources
  - Manage time and effort for applicants
- We are looking for world-leading research

# Application process

Call registration is mandatory  
Full information is on the call webpage

# Assessment process

Details of what happens at each stage are in the call guidance document

# Call registration

- We are using the call **registration** to:
  - Ensure all potential outlines are appropriate for the call
  - Provide an early indication of the research areas and overall level of demand
- You will receive feedback on:
  - Fit to call scope
  - Justification for sLoLa
  - Eligibility (BBSRC remit and applicant)
- There is scope to adjust objectives and teams *after* registering, provided the overall focus is broadly the same

# Call registration

- Send registration via **SurveyMonkey**:
  - <https://www.surveymonkey.co.uk/r/slolaregistration2022>
- Feedback will be provided as soon as possible after submitting - typically within 10 working days
- We aim to filter out proposals that are ineligible or non-responsive to the call scope in the feedback
- We cannot provide any other indication of the competitiveness of proposals

# Outlines

- **2 documents to submit alongside Je-S proposal form**
  - Case for Support (5 pages)
  - Team Résumé for Research and Innovation (R4RI) (3 pages)
- Only **indicative costs** are required by BBSRC at this stage. ROs are therefore advised to take a pragmatic approach to costings.
- Will be assessed solely by the **Strategic LoLa Committee** (no external peer review)

**Deadline: 17 Aug 2022, 4 pm**

# Outlines - Case for Support

- **5 pages**
  - Half-page project summary diagram
  - Additional space for *science case*
- Refer to **submission document guidance** for further information on what to include
- Pay attention to recommended length of content for each section
  - Science case is important but don't neglect other criteria.

**Deadline: 17 Aug 2022, 4 pm**

# Outlines - Team Résumé for Research and Innovation

- **3 pages** (template provided)
  - Role of each team member
  - Evidence of capability within team to deliver proposed work
  - Eligibility
- Showcase **research outputs** and **contributions to teams, people development, scientific community** and **wider society**
  - Examples given should be directly relevant to proposed sLoLa programme
- Refer to **submission document guidance** for further information on what to include

**Deadline: 17 Aug 2022, 4 pm**

# Outlines - Team Résumé for Research and Innovation

- Mitigates against potential biases associated with CVs
  - Allows capture of a wider range of contributions to research and innovation
- Excellent opportunity to showcase why your team is right for the delivery of the proposed project
- Opportunity to highlight particular individuals
  - No need to mention every team member for each section
  - Select most relevant exemplars from within team to showcase

**Deadline: 17 Aug 2022, 4 pm**

# Outlines

- This is going to be a competitive call funding at most ~ 5 awards.
- Investigators can be involved in more than one proposal but PIs can only hold one sLoLa at any time
- We expect a small number of submissions that genuinely meet **all** the assessment criteria to an excellent/ exceptional level to move to the full stage of assessment, following the SLC meeting
- Feedback will be provided to all applicants regardless of outcome

# Full Stage

- More detailed Case for Support plus other documentation, expanding substantially on the information provided at the Outline stage
- Changes to team from outline allowed (please contact us)
- Two assessment stages:
  - **Full proposal** assessed by **external peer review** and **multidisciplinary panel**.
  - **Interview** by **SLC** for those teams whose projects are recommended by the multidisciplinary panel
- Full stage launch will be supported by webinar
  - General feedback from outline stage SLC
  - Expectations for full proposals

# Eligibility

- Standard BBSRC criteria apply
- No requirement for a specific number of prior BBSRC grants
- We expect evidence indicating the team's capability to deliver a programme of this nature and scale (research and management experience)
- We strongly encourage you to consider EDI when forming your team
- We also encourage Researcher Co-Investigator and Fellow involvement, where they are adding value and with appropriate support

# Assessment criteria

- Research excellence
- Importance and transformative potential
- Added value of funding via sLoLa grant
- Capability to deliver
- Management strategy (full stage only)
- Resources (full stage only)

# Some “Dos and Don’ts”

- DO submit proposals on a single Je-S form
- DO include Researcher Co-Investigators/Fellows where relevant
- DO request funding for equipment where necessary to deliver project
- DO include references within the page limit of Case for Support and Team R4RI
- DON’T include international or otherwise ineligible Co-Is
- DON’T submit identical, previously unsuccessful proposals
- DON’T submit standard individual CVs

# Summary

- Read the call text, guidance and formal eligibility requirements carefully
- Address all aspects of the assessment criteria and the call scope
- Ensure you communicate your proposal clearly, for both subject specialists and a more general scientific audience
- Consider team composition carefully. Collaborative teams need to be able to demonstrate full synergy and capability to work together effectively.
- **If in doubt, please contact us for advice: [bbsrc.lolagrants@bbsrc.ukri.org](mailto:bbsrc.lolagrants@bbsrc.ukri.org)**
