Call summary

Call type:
Invitation for proposals

Closing date:
16:00 on 15 September 2022

Funding available:
£3.65 million at 80%

How to apply:
Proposals are invited via Je-S attracting the standard 80% fEC funding model
The funders will host a webinar for applicants on 4 July to answer any questions about this funding opportunity.

Assessment process:
This call will incorporate a panel meeting and interview stage.

Key commissioning dates:
- Deadline for proposals – 15 September 2022
- Panel meeting – mid-October
- Interviews – w/c 31 October 2022
- Funding decision – November 2022
- Grant start date – between 1 December 2022 and 31 January 2023. No 3-month leeway for the start date will be granted.

Contacts:
- Email: edi-caucus@esrc.ukri.org

Please read the full call specification for guidance before submitting your proposal.
Introduction
This is a guidance document created to assist applicants to this call in the completion of their proposal. It is specific to this call and should be used in conjunction with the following information:

- **ESRC Research Funding Guide**
- **ESRC guidance on ’How to write a good research grant proposal’**
- **Je-S help text** is available in every page of your Je-S form, simply click on the question mark against any section (or on the word ’Help’ in the top right hand corner of each page)
- **Je-S helpdesk** (for all Je-S system enquiries) jeshelp@je-s.ukri.org Telephone: 01793 444164

If you experience difficulties using Je-S or have questions regarding its use, helpdesk staff are currently working remotely. Telephone hours are operating normally; Monday to Thursday 8.30am - 5.00pm, Fridays 8.30am - 4.30 pm (excluding bank holidays and other holidays).

When reporting problems by email or telephone, please give your name, organisation and user id, the date and time, what part of the form or system you were working on, and the nature of the problem.

For further information contact:
- **Email:** edi-caucus@esrc.ukri.org

**Important:** Where information and guidance issued in this document differs from the general guidance offered in these sources; you should adhere to the guidance in this document.

Joint Electronic Submissions (Je-S)
All proposals under this call must be completed and submitted through UKRI’s Joint Electronic Submissions (Je-S) system. To be able to do this the organisation must be registered (or self-registered for certain calls) for Je-S, and the applicants must hold Je-S accounts.

There are two possible categories of organisations from which proposals can be submitted:

- **UK higher education institutions** and some other independent UK research organisations are already **recognised institutions** on Je-S (including any recognised Independent Research Organisation®). A list of these organisations is available via https://www.ukri.org/funding/how-to-apply/eligibility/.

*IRO eligibility policy now includes Public Sector Research Establishments (PSREs). Such organisations that have been awarded eligibility status are treated as normal Research Organisations from an eligibility point of view. They can apply as the lead RO and will be funded under fEC rules (i.e. 80%) whether relevant applicant is PI or Co-I status.

*Also, note that applicants based in UK NHS Trusts, Hospitals, Boards or GP Practices that are considering applying as the lead applicant to this call should contact the Je-S Helpdesk
(jeshelp@je-s.ukri.org or 01793 444164) to ensure that their organisation is correctly registered on the Je-S system. If the organisation is not correctly Je-S registered, an email request for Je-S registration will be required from the organisation. **Please allow at least six weeks for the Je-S registration process, prior to the closing date of the call.** Additionally, please ensure that all personal Je-S accounts associated with individuals expected to be named on the proposal have been requested at least seven working days before the proposal will be submitted.

- **Overseas organisations** which have previously registered for Je-S to submit to international focused schemes (but would not be eligible to apply for other research responsive mode schemes). A list of these organisations is available from the Je-S login page. The organisation will have previously set up the submission process and will therefore be available within the Je-S searches.

**Je-S accounts for applicants**

All principal and co-investigators must have a Je-S account which has been verified by a third party before they can be found in searches within the Je-S System and added as an applicant. Je-S accounts should be created as soon as possible once the call opens to allow sufficient time for the account(s) to be verified. To get you started on creating an account please refer to the [Je-S helpdesk](https://www.ukri.org/funding/how-to-apply/eligibility/).

Please ensure that applicants select the ‘Account Type: Research Proposal’ and the option ‘An Applicant on a Standard or Outline Proposal’ - see [helpdesk](https://www.ukri.org/funding/how-to-apply/eligibility/).

**Before creating your proposal**

Research proposals may only be made on research councils' Joint Electronic Submission (Je-S) forms.

Please note that **the deadline for research organisation submission of proposals is 16:00 on 15 September 2022.** You should allow sufficient time for completion of the research organisation submission process checks/authorisation. There is a collective responsibility on both applicant and research organisation to ensure submission meets this deadline and therefore internal organisation submission issues is not considered an appropriate justification reason to a extend deadline. You can view all Je-S registered organisations via page [https://www.ukri.org/funding/how-to-apply/eligibility/](https://www.ukri.org/funding/how-to-apply/eligibility/), to ascertain whether the proposed submitting organisation is registered (this does not include HEI’s).

**Organisation internal submission structure**

Your proposal will be sent to Je-S/ESRC from the submitter pool at your research organisation. (If the call is open to a self-registered organisation then the proposal is submitted direct to Je-S helpdesk). There is a **further layer of administration between your submission of the proposal and the proposal being submitted to the ESRC, via Je-S.** The research organisation’s submission route usually includes both an approver (ie head of department) and submitter pool (ie central finance office), and the ESRC cannot accept responsibility for any delay which may occur.

It is recommended that applicants forward their proposal to the organisation submitter pool in good time (ie at least a week before the call deadline) to allow a sufficient period for the approval and final submission process. This does not apply for self-registered organisations.
The proposal must be submitted through the Je-S System to ESRC by the institution’s nominated contacts. Once the applicant completes and submits the proposal, notification is then sent to their organisation’s ‘submitter’ to action. The ‘submitter’ is the person in that organisation authorised to approve the proposal and do the final stage of submission.

The applicant will receive an email confirming that the proposal has been submitted to the Submitter Pool - this means the proposal is still with the organisation but is not yet submitted to the research council. The final submission process is the responsibility of the host institution, and we cannot accept responsibility for any delay which may occur at this stage. We strongly advise applicants to check that they receive an email confirmation from the Je-S System confirming that the proposal has been submitted to the research council.

We advise applicants to secure confirmation from their relevant administrator that the proposal has been successfully submitted to the Je-S team (see also ‘Tracking your proposal’).

Use of your personal information – UK Research and Innovation capture and process personal information in line with current data protection legislation; General Data Protection Regulation (GDPR) and any amendments by the UK Data Protection Bill and/or relevant acts of parliament.

COVID-19 Guidance for Applicants

- **Accounting for the unknown impacts of COVID-19**

UKRI acknowledges that it is a challenge for applicants to determine the future impacts of COVID-19 while the pandemic continues to evolve. Applications should be based on the information available at the point of submission and, if applicable, the known application specific impacts of COVID-19 should be accounted for. Where known impacts have occurred, these should be highlighted in the application, including the assumptions/information at the point of submission. There is no need to include contingency plans for the potential impacts of COVID-19. Requests for travel both domestically and internationally can be included in accordance to the relevant scheme guidelines, noting the above advice.

(Reviewers will receive instructions to assume that changes that arise from the COVID-19 pandemic, post-submission, will be resolved and complications related to COVID-19 should not affect their scores. Where an application is successful, any changes in circumstances that affect the proposal will be managed as a post-award issue.)

**Creating your proposal**

Log in to [Je-S](#).

From the Home Screen select Documents.

Select New Document then Select ‘Call search’ (highlighted at top of screen). When prompted, type in the call title *Equality, Diversity and Inclusion Caucus Director* and select from the list created. The remaining three selection fields will be automatically populated.
Select the ‘Create Document’ button.

It is the applicant’s responsibility to ensure that the proposal is created and submitted against the correct call (and consequently correct scheme). We will not accept proposals for processing that are not submitted using the above call route.

**Completing your proposal**

The initial Je-S document instructions page will give you general guidance on the navigation layout, specifically icon descriptions.

The left-hand column ‘Document Menu’ lists all the sections associated with this call and clearly identifies which ones are mandatory (red cross, turning to green tick when completed).

The details below are not an exhaustive step-by-step guidance, and we recommended that you refer to the Je-S helptext for additional information.

Please note you may return to edit saved documents at any time.

**Project details**

- Select organisation and department from drop down lists
- ‘Your Reference’ should be supplied by your research organisation (consult your Research Office). If your administration office does not have a system for referencing grant proposals, a suitable reference of your own choice will be acceptable. Use ‘Your reference’ to help distinguish easily between proposals in users’ Current Documents lists. The reference is intended to be a unique identifier for the proposal, and is unrelated to the reference that the organisation would be asked to provide if a grant were awarded.
- Enter ‘Project Title’ (maximum limit of 150 characters)
- The ‘Proposal Call’ will already be populated with the relevant call title; Equality, Diversity and Inclusion Caucus Director.
- Your start date should be no earlier than 1 December 2022 and no later than 31 January 2023. Your grant should be a proposed duration of no more than 36 months.
- Submission route – It is recommended that once this initial section is completed, check the submission path (via Document Actions tab) to see if the proposal has to be signed off by submitters and approvers, in which case please make sure they will be available to process the document on the day you intend to submit it to Council.

**Investigators**

Enter the name of the principal investigator (PI) and any co-investigators (Co-Is) if applicable.

This call allows for Principal Co-Investigators. If submitting a joint application (including job shares), the Je-S application form will require that one of the Principal Co-Investigators will be listed as PI, the other will need to be listed as Co-I. Please provide further information in the Staff section of the form, as well as the Justification of Resources, about the roles of the Principal Co-Investigators.
Investigators may be from more than one research organisation, but the PI must be from the organisation that will administer the grant. If the application is from two Co-Principal Investigators who will lead the Caucus on a job-share basis, applicants must nominate one institution to be responsible for submitting the grant application if the applicants are based at different institutions. The Principal Investigator administering the grant must be based at an organisation eligible for receiving UKRI funding. The Co-Principal Investigator may be from the public sector, independent research organisations, business, civil society, government, or other type of organisations with research capacity. All named investigators are responsible for ensuring that successful proposals are undertaken and completed in the manner specified.

**Post will outlast project**
Select Yes or No. Please note, there is an expectation that the PI’s post will be in place for the duration of a funded project. This means if this question is answered with “No” then a pop-up message will display, confirming that if the proposal is successful it is the RO responsibility to ensure the PI’s post will be extended to match the project end date. By submitting the proposal, the RO is taking collective responsibility to comply with this request.

**Third party data protection** - Applicants must ensure that they have obtained the permission of any other person named on the proposal form (for example any Co-Investigators or Project Partners) for the provision of their personal information to UKRI and the processing of their data by UKRI for the purpose of assessing the application and management of any funding awarded.

**UK co-investigators in business, civil society or government bodies**
Please note that any researcher from an established business, civil society or government body based in the UK will be eligible to be listed as a co-investigator under Equality, Diversity and Inclusion Caucus Director.

The ESRC will fund 100% of justified costs, however, the project costs associated with these types of Co-I contributions must not exceed 30% of the overall cost of the grant (at 100% fEC). Please note that costs cannot be claimed from government bodies.

The lead research organisations of proposals which include co-investigators from the UK business sector or from third sector organisations that engage in economic activity\(^1\) must ensure that the involvement of these organisations complies with any legislation applicable in the United Kingdom on or after 1 January 2021 that regulates the granting by a public sector body of any advantage which threatens to or actually distorts competition in the United Kingdom and/or any other country or countries (“UK Subsidy Control Framework”). Under UKRI grants terms and conditions RGC 2.3.1 it is the responsibility of the Research Organisation to ensure their use of the grant complies with such legislation and any breach

\(^1\)Economic activity’ means putting goods or services on a market. It is not necessary to make a profit to be engaged in economic activity: if others in the market offer the same goods or service, it is an economic activity. Department for Business Innovation & Skills, State Aid: The Basics Guide, July 2014 - https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/443686/BIS-15-417-state-aidthe-basics-guide.pdf. Engagement in economic activity relates to an organisation’s activity rather than its legal form, therefore commercial companies, non-profit organisations, charities, public bodies and research organisations can all act as enterprises, depending on the activities they are involved in.
of the UK Subsidy Control framework (or EU State Aid law if applicable) may require UKRI to recover some or all Grant funding, together with interest. For further information please refer to the BEIS guidance for Subsidy Control.

Proposals which include co-investigators from third sector organisations that are deemed **not** to engage in economic activity must provide evidence of this status in the Justification of Resources section of the proposal form.

On receipt of the proposal, eligibility of business, civil society or government body will not normally need to be checked if it is reasonably clear that they are appropriate to conduct the work. Where there is doubt, checks will be carried out should a positive funding decision be taken.

It is recommended that potential UK co-investigators from business or civil society should create Je-S accounts as soon as possible once the call opens to allow sufficient time for the account(s) to be verified.

The costs that can be claimed for business, third sector and government body Co-Is is dependent upon the organisational sector and whether or not the organisation is engaged in economic activity, as set out in the **UK business, third sector or government body co-investigator guidance**. The lead research organisation must ensure that any costs they request are compliant with UK Subsidy Control Regulations and evidence this in the Justification of Resources.

All project costs relating to UK business or civil society co-investigators must be prefixed as 'UK Co-I’s business or civil society costs’ and must be entered into the costs section on Je-S as follows:

Co-investigator ‘time’ allocation and salary costs must be entered under the standard ‘Co-Investigator’ section. (Please tick the ‘Exception’ box to ensure 100 per cent costs claimed). Other staff related costs whether, fieldwork, equipment or travel and subsistence should be entered in the ‘Other DI’ Section as exceptions and marked as Co-I costs.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the ‘Justification for Resources’ attachment of the Je-S form which costs in the proposal relate to the UK co-investigator’s business, civil society or government body. Please note that UK co-investigator’s business or civil society salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK co-investigator’s business or civil society organisation.

Host/submitting institutions are reminded that for calls that encourage non-academic Co-Is, a suitable support structure should be in place to assist such individuals in registering for Je-S accounts and contributing to the research case.

The ESRC ‘Business, Third Sector and Government Body’ Co-I policy does not apply to eligible PSRE organisations (see page 4 for eligibility ruling). Such organisations can apply under the standard fEC rules.
International co-investigators
Please note that any academic researcher (PhD or equivalent) from an established international research organisation of comparable standing to an ESRC-eligible UK research organisation will be eligible to be listed as an international co-investigator under this scheme. Please note that international costs must not exceed 30% of the full 100% fEC cost of the grant. However, the total of these costs and the costs for UK co-investigators in business, civil society of government bodies must not exceed 30% of the full 100% fEC cost of the grant.

It is recommended that potential overseas-based co-investigators should create personal Je-S accounts as soon as possible once the call opens to allow sufficient time for the account(s) to be verified.

International co-investigator salary costs should be entered under the ‘Co-Investigator’ section and should be marked as an ‘Exception’ using the tick box. Other staff related costs whether, fieldwork, equipment or travel and subsistence should be entered in the ‘Other DI’ Section as exceptions and marked as Co-I costs.

All costs must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the ‘Justification for Resources’ attachment of the Je-S form which costs in the proposal relate to international research organisations. Please note that international co-investigator salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the international research organisation.

Objectives
List the objectives of your research in order of priority. (4000 character limit)

Summary
Provide a plain English summary of the research you propose to carry out in a language that could be publicised to a general, non-academic audience. Please note that this section will be made available on the Gateway to Research database, therefore applicants should ensure confidential information is not included in this section (4000 character limit)

Academic beneficiaries
Please summarise how your proposed research will contribute to knowledge, both within the UK and globally. This should include how the research will benefit other researchers in the field and identify whether there are any academic beneficiaries in other disciplines and, if so, how they will benefit and what will be done to ensure that they benefit.

Please list any academic beneficiaries from the research and give details of how they will benefit and how the results of the proposed research will be disseminated. Also describe the relevance of the research to beneficiaries. (4000 character limit)

Please note that this section may be published to demonstrate the impact of research council-funded research. Please ensure confidential information is not included in this section.

For further detailed guidance please access the helptext page linked to this Je-S section.
**Staff duties**
Summarise the duties of the staff members that will be involved in your project, including the applicants.
If your project includes a Principal Co-Investigator please provide details here of their specific role and responsibilities.
Ensure that it is clear why it is necessary for staff to perform their roles at the resource level you have requested. *(2000 character limit)*

**Ethical information**
This section must be comprehensively addressed. *(4000 character limit)*

Applicants must ensure the proposed research will be carried out to a high ethical standard and must clearly state how any potential ethical and health and safety issues have been considered and will be addressed ensuring that all necessary ethical approval is in place before the project commences and all risks are minimised.

The [ESRC’s Framework for Research Ethics](https://www.esrc.ac.uk) contains a full explanation of our approach, with guidance for applicants.

**Other support**
Enter details of any support sought or received from any other source for this or other research in the same field in the past three years. Complete all fields for support either received or pending a decision. Contributions from project partners should not be entered here - they should be detailed in the project partners’ section.

**Related/previous proposals**
Please state whether your application under this call is related to any proposals previously submitted to us. Please note the [policy on ‘invite only’ resubmissions](https://www.esrc.ac.uk). You must detail the appropriate related proposal and its relationship here. Select ‘Related Proposals’, then ‘Add New Related Proposal Item’ before entering the details of any related proposals.

Please enter the reference numbers of any support sought or received from us in the past five years via the ‘Previous proposals’ section. Please note that this only relates to previous ESRC research grants.

**Staff**
If your project requires staff other than the team of investigators, their details should be entered here. ‘Directly Allocated staff’ are those who will be working directly on the project, but whose involvement on the grant can only be based on an estimate of the time the work will take (e.g. investigators). ‘Directly Incurred staff’ are those whose time on the project is actual, auditable and verifiable (e.g. researchers and technicians). It is also possible to capture Researcher salary costs under the exceptions (100% contribution) cost type, if they are international based.

Associated (project) studentships are not permitted in this call.
Resources
All resources requested must be fully justified in the ‘Justification’ attachment. The Equality, Diversity and Inclusion Caucus Director will provide up to 36 months funding with an overall limit of £3.65 million (80% fEC) for the successful grant. The ESRC will meet 80% of the full economic costs on proposals submitted and the host institution is expected to support the remaining 20%.

Funding for the flexible commissioning fund should follow ESRC’s funding rules and be made at 80% fEC. The ROs in receipt of this devolved funding must make up the remaining 20%. It is not the responsibility of the RO leading the Caucus to make up the 20% contribution for the commissioning fund.

Devolved funding for small projects should be put under ‘Other directly incurred costs’. This will be funded at 80% fEC. Where non-academic or international organisations are the recipients of a flexible commissioning fund grant, they are eligible for 100% fEC funding.

We recommend that the amount for the flexible commissioning fund is ring-fenced for this purpose only. When funds are ringfenced virement into other costs is not permitted.

T&S - add each item of Travel and Subsistence required for your project. You should indicate the calculations upon which this figure is based in the ‘Destination and Purpose’ box.

Conferences - Predicted costs for conference attendance will be funded where the conference is named, justified and costed in the proposal. The justification should show how the conference will either directly benefit the research or facilitate future impacts of research. Justification must also be provided for the number of project members attending a conference. ESRC encourages early career researcher conference attendance where it can be demonstrated to be a key development opportunity.

Equipment - enter any items of equipment costing £10,000 or more (including VAT) in this section. The actual level of funding sought from the ESRC should also be entered in this section.

For items of equipment costing between £10,000 and UKRI equipment purchase threshold value (£115,000 excluding VAT), the research organisation will need to provide extra justification for these items in the ‘Justification of Resources’ attachment, providing evidence of an evaluation of the use of existing relevant capital assets to confirm why this existing equipment is not sufficient. Host ROs are expected to make a contribution towards the cost of the equipment in the order of 50% of the cost, therefore equipment should be costed at 50% of the full cost only.

All requests for items of equipment costing above the UKRI equipment purchase threshold (£115,000) should be accompanied by a two-page business case (to be included as an attachment within the equipment screen and not the attachments section) outlining the strategic need for the equipment. UKRI will decide the strategic location for these items and will potentially fund them at 100%. The ESRC will have flexibility in relation to the funding of
equipment to negotiate with potential grant recipients to achieve best value from the limited funds at its disposal.

For all items of equipment requested above the UKRI equipment purchase threshold (£115,000) three equipment quotations must be provided. Where you believe that there are less than three potential suppliers for an item you should explain this in the ‘justification of Resources’ attachment and upload two blank documents as equipment quotes. For items of equipment which cost less than the UKRI equipment purchase threshold it is optional to provide quotations and up to three can be uploaded.

**Social surveys** - Social survey costs which are being sub-contracted should be included under this section and are eligible for fEC exception funding at 100% (for the amount sought from the council). (See ‘other directly incurred costs’ section if surveys are to be done using in-house resources.)

**Other directly incurred costs** - including justified; project specific consumables, consultancy fees, equipment costing less than £10,000, recruitment and advertising costs.

Costs for social survey work proposed to be done using in-house resources should also be included under this section and will be funded at the standard 80% fEC funding rate. Proposals including such costs will need to fully justify why the work should not be subject to external competition, and provide benchmarking or other data to support a case that best value for money is being achieved through using research organisation staff rather than external contractors.

All costs relating to UK business and/or civil society co-investigators and/or international co-investigators must be specifically justified, and applicants must explain why such costs are required to achieve the aims of the research project. Applicants must also state clearly in the ‘Justification for Resources’ attachment of the Je-S form which costs in the application relate to UK business, civil society or international research organisations. Please note UK business, civil society and international co-investigator salary costs should only be claimed where clear justification is provided as to why this cost cannot be met by the UK business, civil society or international research organisation.

To enable UKRI to meet transparency and external audit requirements all overseas costs must be identified in the free text box using the format 'Organisation (e.g. Overseas RO): Country (Oversea Country) Cost Category (e.g. staff/T&S/other DI costs) Cost Description (e.g. PDRA/ flights/workshops, etc)

**Other directly allocated costs** - including support staff salaries, a share of the costs of departmental support staff and the costs of access to major research facilities.

**Estate and indirect costs**

Estate and indirect costs are specific to each research organisation, and do not require justification in your case for support.

Research organisations that have implemented the TRAC costing methodology and have passed the Quality Assurance process should apply their own estate and indirect costs. Non-research organisations that are not required to implement TRAC must have a robust
costing methodology in place that has been validated in order to apply their own estates and indirect cost rates. The standard default rates should be used where research organisations have not yet developed their own rates.

Your Research Office will be able to assist with this section.

**Project partners**
If you have secured a commitment from another organisation or funding body to provide additional resources for this project, the details of that support should be entered here. **It is important that all organisations that are contributing either directly or indirectly to the intended research, are identified.** If not, their contributions to the project cannot be reflected in our assessment process or in the summary of the project published externally, if it is funded. A Project Partner letter of support from each partner organisation confirming the level of support specific to this proposal must be uploaded via the Project Partner details screen (not in the attachments section). Project partner letters of support can be accepted as an email version, but all letters of support **must** be signed by the relevant member of the Project Partner organisation and **must** be dated within six months of the proposal submission date.

**Timetable**
Provide a clear timetable for the project and the intended progress of the research through the different stages. Your planned timetable can be expanded upon if necessary within your case for support.

**Data collection**
Applicants must adhere to ESRC policy. Please refer to the full statement on data management planning and datasets deposition requirements for data intensive investments in the [ESRC Research Data Policy](#) and in the [Research Funding Guide](#). Explain clearly how you will meet these requirements if relevant to your proposal. Complement but do not duplicate the information provided in the Data Management Plan as explained below.

**Reviewers (academic and user)**
Please **do not** nominate any reviewers, as all proposals will initially be assessed by a shortlisting panel.

**Classifications (International in Nature)**
Please identify whether the research will involve significant collaborative contributions from colleagues outside of the UK. This could include the research area of focus, collaborations, data sets or any other notable international aspect of the research. You should answer yes if:

- Any significant part of the research is international, for example, if one or more work packages have an international component.
  
  **And/or**
  
- Either a Principal Investigator, Co-Principal Investigator, Co-Investigator, Project Partner or any other organisation involved in the project is based overseas.
If Yes, please complete free text box (maximum 1000 character limit)
Please detail the nature of the international aspect of the research and identify all countries involved.

- Where the research area of focus is international, explain the nature of this focus and all the countries involved.
- Where an international organisation is involved, please identify this organisation and the country(ies) in which it is based.

User involvement
If ‘Users’ have been/will be engaged with your research project, please specify the nature of their engagement. ‘Users’ are individuals, groups or organisations who have an interest in or may benefit from the research. Users may be from the public sector, private sector, civil society or the wider public in general. Engaging users in your research from its conception and development through to the dissemination stage is likely to increase the impacts achieved. Applicants should expand upon how the proposed work will be managed to engage users and beneficiaries in the Case for Support attachment.

Attachments
It is important that applicants only submit the supporting attachments specified in this document. We reserve the right to reject applications that do not include the required attachments or include attachments not specified in this guidance. Attachments should be uploaded as PDF (rather than Word) to ensure automated conversion does not cause problems with maximum length. Attachments should be in font size 11 with 2cm margins (recommended font type; Arial or Garamond).

The following are mandatory Je-S attachments for this call:
- Case for support
- Justification of resources
- Data Management Plan (for grants planning to generate data)
- CV
- Workplan

List of Publications, Letter of Support, Proposal Cover Letter, Facility form, Final/Interim Report, Project Student Request and Other are optional attachments* and should be included where necessary.

*Please note guidance against these specific attachment types below, as to when submission is considered mandatory/appropriate.

Important note: If you are unclear about whether you can include a specific attachment please contact edi-caucus@esrc.ukri.org for advice, as unrequested attachments can hinder the processing of your application. ESRC reserves the right to return or reject proposals that include attachments not permitted on this call.
Case for support (maximum of 8 sides of A4)

This is the body of your research proposal. It must not exceed 8 sides of A4 and must include the following sections:

- An introduction setting out how you will meet and deliver the caucus’ objectives, how you will address the policy and evidence gaps in EDI research and practice, and your strategies for influencing EDI policies in the wider research and innovation system.
- the leadership team’s understanding of the main stakeholders and the key challenges and opportunities around EDI in the research and innovation system
- key topics and priority evidence gaps identified by the proposed leadership team as areas of potential focus for the EDI caucus in year one. This proposed focus should allow for the generation, synthesis, and sharing of high-quality evidence on the effectiveness of different EDI practices
- an EDI plan to underpin how the caucus operates. This should give consideration to:
  - the recruitment of caucus members
  - how the leadership team will engage caucus members
  - career development of any staff, such as the programme manager and any postdoctoral researchers that are employed to support the caucus
  - the leadership team’s approach to engaging stakeholders, including working with funders and other actors with an interest in EDI
  - a description of the governance structure and roles.
- plans for stakeholder engagement that recognise the groups and institutions involved in supporting EDI improvements in the research and innovation system
- a proposed process for:
  - Allocating funding for new research projects via the commissioning fund including how this work will add value to the Caucus’ work and to the communities they will be working with.
  - Overseeing and embedding the activities that are supported by the caucus.
  - If your work involves data collection or acquisition you must demonstrate that you have carried out a datasets review, and explicitly state why currently available datasets are inadequate for the proposed research.
  - The data, materials or information to be collected should be clearly stated, and the methods for achieving this explained. Where sampling is involved, the sampling frame, population and sample sizes, the sample design and arrangements for any pilot should be specified, and the reasons given for the procedures adopted. Where access to people or archives is needed, indicate clearly the records, population or samples to be consulted, and any permissions already obtained.
  - Include details of any potential for linkages to other research, knowledge exchange or public engagement activities (for example, those supported by other funding bodies in the UK or beyond) or for international collaboration.
  - Include details of any capacity-building activities.

The case for support should be a self-contained description of the proposed work with relevant background and references and should not depend on additional information such as the inclusion of external links. Assessors are advised to base their assessment on
the information contained within the application and are under no obligation to access such links (so they should not be used to provide critical information).

The bibliography for any references cited in the proposal should be attached under the ‘list of publications’ document; this should not include publications not cited in the proposal. A list of the most relevant and recent publications should be included in the applicant CVs.

**Justification of resources (maximum of four sides of A4)**

A four-side A4 statement justifying that the resources requested are appropriate to undertake the research project. The justification of resources should explain why the resources requested are appropriate for the Caucus, taking into account the nature and complexity of the proposal. It should not be simply a list of the resources required, as this is already given in the Je-S form. Where you do not provide explanation for an item that requires justification, it will be cut from any grant made.

Proposals which include co-investigators from third sector organisations that are deemed **not** to engage in economic activity must provide evidence of this status within the Justification of Resources statement.

**Estates, Indirect and Infrastructure Technician costs do not need to be justified within the Justification of Resources.**

Please refer to [Je-S for further guidance](#).

**Data Management Plan (maximum of three sides of A4)**

It is a requirement of the [ESRC Research Data Policy](#) that all applicants planning to generate data as part of their grant must include a Data Management Plan. The Data Management Plan should be used as an opportunity to describe how the data, i.e. primary input into research and first-order results of that research, are going to be managed - starting from planning for research and through the life-cycle of the grant until data is accepted for archiving by the UK Data Service.

The ESRC recognises the importance of research data quality and provenance. Research data generated by ESRC-funded research must be well-managed by the grant holder during the grant period to enable their data to be exploited to the maximum potential for further research. For further guidance see the Je-S HelpText.

**CV (maximum of two sides of A4 per person)**

A CV for each applicant, named research staff member and consultant must be included. This should include contact details, qualifications (including class and subject), academic and professional posts held since graduation, a list of the most relevant and recent publications, and a record of research funded by the ESRC and other bodies. This should not exceed two A4 sides.
Workplan (maximum of one side of A4)
This is a mandatory one-page document. The work programme should be illustrated with a simple diagrammatic work plan, such as a Programme Evaluation and Review Technique (PERT) or Gantt chart.

List of publications
The bibliography for references cited in the proposal only should be attached. Please note publications not cited in the proposal should not be added here. A list of the most relevant and recent publications by the applicant should be included in the applicant CV.

Final/interim reports (maximum of three sides of A4)
Principal and Co-Investigators on current awards must submit a progress report on their current awards with any new proposal which should match their impact and output records on Research Fish

Proposal cover letter/letter of support (maximum of one side of A4 per document)
Proposal cover letter attachment type can be used to upload a declaration of interest, any private, personal or commercial interests relating to an application for funding to the ESRC must be declared.

Exceptionally letters of support can be submitted as part of a proposal; provided they are essential to the successful conduct of the research (e.g. confirming access to datasets, or confirming access to or use of the facilities provided by named organisations). Letters of support can be accepted by email, and must be signed and dated within six months of the proposal submission date. General letters of support that are not essential for the successful conduct of the research or do not confirm any specific contribution to the project should not be included.

Proposal classifications
The information provided in this section will be used by us to identify appropriate assessors. It would therefore assist us greatly if you could populate the Research Area/Qualifiers/Keyword sections to provide a comprehensive description of your area of expertise.

The Proposal classification area is a harmonised (and expanded) structure agreed with other UKRI councils. Therefore, if your area of expertise crosses the remits of more than one UKRI council you will now only need to provide the information once.

Submit your proposal
After all mandatory sections have been completed, the submit button will appear across the top menu bar. Please ensure that you have completed all attachments that are not standard mandatory attachments for Je-S but are a mandatory requirement to be completed for this specific call. The submit button will route your finalised proposal to the authorising facility within your organisation (as explained in the Registration section above).
Please note that the proposal must be formally submitted by your organisation before **16:00 on 15 September 2022.**

**Commissioning timetable**

- Call for proposals issued: 8 June 2022
- Deadline for submitting proposals: 16:00 on 15 September 2022
- Commissioning Panel meeting: Mid-October 2022
- Interview Panel meeting: w/c 31 October 2022
- Decisions to applicants: November 2022

**Tracking your proposal**

There are additional document maintenance actions that can be undertaken via the Document actions button. For example, the ‘Show submission path’ will indicate to you where in the organisation submission chain the proposal currently is located (and who holds current responsibility) - e.g. owner, approval pool, submitter pool or submitted to Council.

**Further enquiries**

Enquiries relating to ESRC research funding rules and proposal procedures should be addressed to:

- Email: edi-caucus@esrc.ukri.org

Enquiries relating to technical aspects of the Je-S form should be addressed to:

- Je-S helpdesk
  - Email: jeshelp@je-s.ukri.org

If you experience difficulties using Je-S or have questions regarding its use, helpdesk staff are currently working remotely via email. If phone assistance is required a call back can be provided. Opening hours are Monday to Thursday 8.30am to 5pm and Fridays 8.30am to 4.30pm (excluding bank holidays and other holidays).
