Question 1 – Strategic objectives

Summarise the institutional strategic objectives that relate to knowledge exchange and guide your plans for HEIF.

We expect institutions’ plans for HEIF to be guided by strategic objectives for knowledge exchange. However, there is no requirement for institutions to submit or maintain a standalone knowledge exchange strategy document.

We appreciate that KE objectives may be found in a specific KE strategy document or they may be contained as part of other strategic documents such as teaching, research or overarching institutional strategies.

Whatever form your knowledge exchange objectives are in, please provide a precis of the main objectives here so that we can see the strategic context that guides your plans for HEIF and forms the basis for your monitoring and delivery of intended benefits.

We welcome the inclusion of hyperlinks to published strategies and plans that may be referenced in the summary.

In answer to this question, you are free to use text or tabular format but please ensure that the question response is contained in no more than two pages of A4.

Summary of process to develop our strategy

Between December 2020 and April 2021 we undertook a strategy development process including
- understanding our performance as measured in KEF
- a SWOT analysis to understand internal context (strength and weaknesses) and external environment (opportunities and threats).
- A data “deep dive” to understand partnership activity and income trends
- Conversations with colleagues across the University, including through formal governance structures and informally with our KE Hotspot leaders (see below).

We were very pleased with the level of energy and engagement in the process, particularly given the overlap with REF submission deadline and more generally school closures / lockdown. This engagement indicated high levels of energy and engagement with the importance of KE.

What are our priorities for growing specific areas of KE

Utilising and analysing the inputs and information gathered in the strategy development process, our overall performance priorities are summarised as follows;

- **Continue to improve** performance in two crucial areas for the University and our “place”;
  - Student enterprise – to support employability and enterprise growth, particularly in the Liverpool City Region.
  - IP commercialisation – creating impact and economic growth
• **Maintain our performance** in public engagement, working with the public sector and business through a range of KE support mechanisms including professional support and development programmes led by the Academy.

• **Build on existing high performance** in research partnerships by creating a more structured approach to KE for our research themes to grow strategic partnerships, through alignment between our areas of expertise, those of our partners and funder opportunities.

• **Ensure we have the infrastructure** to market our achievements, meet funder requirements and report and review performance.

**Priorities into objectives**

Our focused KE objectives are to:

1) **Create an enterprise ecosystem**, linking student activity, enterprise education in the curriculum, academic enterprise development and new ULMS Entrepreneurship Centre.

2) **Achieve inclusivity and intensity** through a dual approach to KE –
   a) **“KE for all” / inclusive KE** by creating a broad base of opportunities to enable colleagues at all career stages to develop skills and become involved in KE.
   b) **Intensive KE through “KE hotspots”** by focussing activity where our distinctive research strengths attract greater clusters of talent, resources and priority partners.

3) **Evidence increased income and impact** through marketing, monitoring and reporting and KE Concordat\(^1\) action planning.

---

\(^1\) [https://www.keconcordat.ac.uk/]
We decided these areas would be a focus for institutional and HEIF investment. We also agreed to continue high quality CPD in a small number of specialist areas, for example our successful provision in dentistry, public health and acoustics, however this would not be a focus for HEIF investment.
**Question 2 – Use of HEIF**

How do you intend to use your 2021-22 to 24-25 HEIF allocations?

As detailed in [RE-CL-2020-04](#) and RE-P-2020-03, in order to enable institutions to effectively respond to the Covid-19 pandemic, we will use the 2019-20 HEIF Annual Monitoring Statement submitted in February 2021 to gather information about the use of HEIF during 2020-21.

In this accountability statement return we would like to know about your plans for HEIF for the remainder of the funding period 2021-22 to 2024-25. Please include indication of the planned timescale of the activity e.g. 2021-22 only; ongoing or 2022-23 onwards.

Please use the response layout grid provided overleaf, to provide the following information:

a) Describe the key activities supported by your HEIF allocation.
b) Include specific reference to how you expect HEIF to support these activities – i.e. specific expenditures: funded posts, academic staff buy out, internal competitive projects; and the proportion of the activity that is supported by HEIF (e.g. x1 business development post 50% HEIF funded).
c) How these activities relate to the government priorities and RE-OfS strategic objectives outlined in paragraphs 9 and 10 of RE-P-2020-03. Where student benefits are achieved, please include an indication of the number of students benefiting.
d) Which strategic KE objective, as outlined in question 1, does each activity relate to.
e) Indication of the timescale for each activity (e.g. 2021-22 only, ongoing or to be confirmed)

*In answer to this question, please use the response grid provided and ensure that the entire question response is contained in no more than six pages of A4 or A3.*

Question 3 – Monitoring success

How do you manage your HEIF funding and monitor the success of your activities against the strategic objectives set out in question 1, and in line with delivering Government priorities?

Describe the policies, procedures and approach you have in place in the context of your strategic objectives to:

i. manage your HEIF spending
ii. measure progress
iii. evaluate outcomes and
iv. identify lessons learned.

In answer to this question, you are free to use text or tabular format but please ensure that the entire question response is contained in no more than four pages of A4.

i. Managing HEIF spend

There is dedicated pre-award support to ensure that spend is allocated as per KE strategy. Individual cost centres are established for all activity linked to HEIF funding under an umbrella code so that all spend linked to HEIF can be identified and monitored.

There is also a dedicated post award support to review budget v actual spend on all HEIF cost centres. Each budget holder receives monthly statements which identify spend to date against allocated budget. Any potential under/overspends are identified and conversations with the budget holders are arranged to understand if activity remains on target to achieve originally planned outputs.

Variance analysis is reported to Management team quarterly and actions taken to address any changes which may impact upon achievement of strategic objectives.

ii. Measuring progress

Working with the relevant colleagues have undertaken a process to define what successful outcomes for each of our KE strategy objectives would look like over the plan period. Clear number and value targets have been identified alongside specific activity and output milestones, to support the tracking of progress towards the desired outcome. Defined timescales have been set for achievement of these targets. Each area has a key
named individual with overall responsibility for delivery of the objective and provision of the data and information by which we will monitor progress.

Appointment of a dedicated monitoring and evaluation officer (MEO) is underway to support the embedding of our monitoring and evaluation framework for KE. The MEO will be responsible for regularly collecting and recording data and information to track and measure progress against our KE strategy objectives. Regular progress updates will be reported through the governance structure to key institutional committees, including the KE Steering Group and Research and Impact Committee.

iii. Evaluating outcomes

An evaluation of outcomes against intended benefit will take place for each strand of our KE objectives. This will be in line with pre-agreed timescales and supported by the MEO. The impact/success of each intervention will be considered, informed by analysis of the data and information collated as part of the monitoring process, input from stakeholders, and an assessment of return on investment and value for money. Evaluation reports will be presented through the governance process outlined above to provide evidence to support future investment decisions and strategy development.

iv. Identifying lessons learned

The process to identify lessons learned will be built into the monitoring and evaluation framework, with findings that could potentially benefit future activities being explored and logged. The findings will be shared widely, including with stakeholders and through the governance structure, to ensure dissemination of key lessons learned and the embedding of good practice. Lessons learned will be documented and stored to provide a repository that is built up over time as a reference for future activities.

This approach of actively identifying and embedding lessons learned is already underway, with key findings from our support for the Research Excellence Framework being fed into our KE plans and activities. For example, lessons learned from systems development work to support tracking of key information for REF has fed into plans for development of systems and dashboards to support monitoring of progress towards our KE ambitions.
