

## **Equality Impact Assessment – Network Plus**

UK Research and Innovation (UKRI) is committed to promoting equality and participation in all its activities, whether this is related to the work we do with our external stakeholders or whether this is related to our responsibilities as an employer. As a public body, we are also required to have due regard to the need to eliminate discrimination, advance equality of opportunity, and foster good relations when making decisions and developing policies. To do this, it is necessary to understand the potential impacts of the range of internal and external activities on different groups of people.

What is an Equality Impact Assessment and why does UKRI use it?

When developing a new scheme, or considering changes to an existing one, UKRI will carry out an equality impact assessment to review how it may affect particular groups or individuals and will take the findings into account. We expect that very rarely our actions will create barriers to participation. The assessment may however flag issues that are not of UKRI's making but we will, where it is in our remit to do so, recommend actions and adjustments. Some impacts are not exclusive to the scheme or change that is being evaluated and need to be addressed throughout our organisation. In some cases, we may not have enough expertise and we will consult with others.

Our leadership and building on good practice

It is our ambition to be recognised as a leader in Equality, Diversity and Inclusion and to build on our record of achievements to date, following on from the RCUK, Innovate UK and HEFCE Action Plans. These Plans are updated from time to time and Equality Impact Assessments will help us to prioritise actions.

Current good practice that is relevant to the Network Plus includes our:

- Grant terms and conditions, including recognition for sick leave and all forms of parental leave
- EDI in Panel Meetings Guidance for all panel members.

There are multiple dimensions/aspects to this Equality Impact Assessment:

- 1) Ensuring that the eligibility criteria are clear and objectively justified
- 2) Ensuring that the submission, peer review and awarding processes are free from unintentional bias
- 3) The identification of any potential barriers to attendance and participation in the call and the assessment and awarding process as below
  - a. Meeting duration – Appropriate duration to facilitate good environmental conditions for assessment and inclusion
  - b. Venue location/format and arrangements to accommodate needs

- c. Broad ranging panel membership
- d. Meeting management/Chair/robust assessment criteria

## GENERAL EQUALITY AND DIVERSITY CONSIDERATIONS

UKRI's research commissioning processes are designed with fairness in mind.

### Eligibility and criteria

- The Network Plus opportunity is open to all eligible research organisations (RO). Applicants are eligible for funding whether or not they are established members of a recognised RO, but applicants who are not an established member of a recognised RO must be accommodated by the RO and provided with appropriate facilities to carry out the research.
- Include if appropriate:  
[Track record is not a funding criterion for the scheme, and panels are briefed that they should not pay particular attention to track record of applicants. Whilst track record may play into panel decisions it should not be emphasised to the extent that innovative / potentially high impact work by less established researchers is disadvantaged. Panels are instructed to assess the application in front of them and not to 'read between the lines' or give the benefit of the

doubt based on the reputation of the individual applicant or team, as this would be a form of confirmation bias.]

### **Standard Grant Terms and Conditions:**

- UKRI standard Grant Terms and Conditions comply with UK equality legislation and include provisions designed to mitigate against potential negative impacts (e.g. sick pay, parental and adoption leave, the possibility of part-time and flexible working, and grant extensions).
- Research Organisations are subject to equality legislation and have a duty to comply with it. RGC 8 states that 'The Research Organisation must assume full responsibility for staff funded from the grant and, in consequence, accept all duties owed to and responsibilities for these staff, including, without limitation, their terms and conditions of employment and their training and supervision, arising from the employer/employee relationship.' Universities are therefore required to make reasonable adjustments as required to support their staff.

### **Panel recruitment:**

- We will aim to ensure that the composition of the commissioning panel is diverse, with at least a 60:40 gender balance.
- We will ensure (if possible) that the chair and vice chair of the commissioning panel are not the same gender.
- Whilst panel members are appointed, first and foremost, based on expertise, we will aim to appoint a diverse panel membership. Final decisions take into account trying to balance the panels by gender and geography and seek to ensure a diversity of institutions. We will only make recruitment decisions which compromise diversity when it is objectively justified by the necessity to ensure the required breadth of subject expertise with high quality candidates.
- A tool has been developed which allows ESRC staff to assess the EDI characteristics of commissioning panels, and this will be used when selecting and appointing panel members.
- The Dementia Network Plus has a particular emphasis on including People with Lived Experience and therefore a separate pre-panel will be arranged to include representatives of People Living with Dementia and carers. We will aim to appoint a diverse panel membership. Comments from the pre-panel will be fed back to the main panel members.
- 

### **Process**

- The UKRI Peer Review Colleges should be the first source of peer reviewers consulted by UKRI staff. Where it is not possible to secure the necessary peer review from within the college membership, UKRI case officers will look beyond the college membership.
- All members of the ESRC community are encouraged to complete the ESRC peer review training tool which is mandatory for Peer Review College members. The training tool outlines the ESRC's standard peer review process and emphasises the importance of timely, objective, fair and informed peer review.

- The membership of the Peer Review College aims to reflect the community it represents and efforts are made to achieve an appropriately balanced membership in terms of gender, age, ethnic origin etc.
- Peer reviewers are required to evidence their views and scores. UKRI staff conduct usability checks on all peer review comments and where there is evidence of bias or a reviewer has failed to provide evidence for their scores the review will be marked as 'unusable'.
- All panel members will receive guidance which covers issues including fairness, objectivity and safeguarding the peer review process.
- It is the role of panel members to moderate and assess the quality of peer review and to agree final scores for each proposal. Panel members will be briefed on safeguarding the peer review process and encouraged to feel empowered to constructively challenge potential bias where they identify it. The Panel Chairs and Panel Secretaries play a particularly important role in this respect. An implementation intention statement will be read out at the beginning of the commissioning panel meeting which sets the tone for discussions and requires that panel members pay close attention to the scoring criteria and definitions.

### Network Plus Flexible Funding

- Grant Holders will be expected to adhere to EDI considerations and key principles as set out in the [UKRI guidance for equality, diversity and inclusion](#) so as to not disadvantage individuals on the basis of protected characteristics when awarding flexible funds.
- Grant Holders should ensure the flexible funding process encourages submissions from applicants of all backgrounds and abilities. Grant holders are encouraged to be flexible with scheduling and in implementing any reasonable adjustment requests for their own internal competitions and processes.

<b>Other characteristics not protected under the Equality Act</b>	Potential negative. For instance, we wish to ensure that potential applicants and stakeholders are not disadvantaged by geography,		<p>ROs need to be clear of their duty of care. The Research Organisation is responsible for compliance with the terms of the Equality Act 2010 including any subsequent amendments introduced while work is in progress; and for ensuring that the expectations set out in the <u>guidance for equality, diversity and inclusion</u> are met.</p> <p>Call specifications will draw attention to UKRI's aspirations around ED&amp;I.</p> <p>We work to ensure that panels are balanced as far as possible (within the constraints of quality and appropriateness) across</p>

	institutional status etc.		<p>the range of protected characteristics, and across broader characteristics including participation from post-1992 and Russell Group institutions, ensuring that we have a good geographical spread of panel members across the four nations of the UK, and across a diversity of career stages and paths.</p> <p><b>Dementia Network Plus</b></p> <p>People with Lived Experience and carers will be involved in a number of aspects of the Dementia Network Plus. We will ensure reasonable adjustments are made as required. The examples and actions outlined in the Disability section above apply to People with Lived Experience.</p>

### Evaluation:

Question	Explanation / justification	
Is it possible the proposed policy or activity or change in policy or activity could discriminate or unfairly disadvantage people?	See the potential negative impacts outlined above.	
Final Decision:	Tick the relevant box	Include any explanation / justification required
1. No barriers identified, therefore activity will <b>proceed</b> .		
2. You can decide to <b>stop</b> the policy or practice at some point because the data shows bias towards one or more groups		
3. You can <b>adapt or change</b> the policy in a way which you think will eliminate the bias	✓	See the mitigations outlined above.

4. Barriers and impact identified, however having considered all available options carefully, there appear to be no other proportionate ways to achieve the aim of the policy or practice (e.g. in extreme cases or where positive action is taken). Therefore you are going to <b>proceed with caution</b> with this policy or practice knowing that it may favour some people less than others, providing justification for this decision.
