## **Equality Impact Assessment**

	Question	Response
1.	Name of policy/funding activity/event being assessed	AHRC Research Infrastructure for Conservation and Heritage Science (RICHeS) Call
		Develop Digital Research Services for Heritage Science Research
2.	Summary of aims and objectives of the policy/funding activity/event	This is an opportunity to apply for funding to build and host a set of services that will enable researchers and other users to find and access equipment, facilities, expertise, reference collections, and research data relating to heritage science research.
		All eligible institutions are welcome to apply. The successful applicant will design, build, test, launch and host a digital data service which will bring together data from heritage science and conservation research-practicing and collections- holding organisations across the UK. You will make the data freely available to researchers and other users, in line with FAIR principles.
		<ul> <li>There are three components to this data service:</li> <li>a directory of research facilities, equipment, reference collections, and specialist expertise</li> <li>an online portal, to make existing collections navigable and searchable</li> <li>a repository for research data</li> </ul>
		In addition to the Digital Research Services opportunity, two additional calls for RICHeS have been launched concurrently. These consist of a call to host collections as part of the RICHeS infrastructure, and a call to host facilities as part of the programme. These opportunities can be found on the UKRI Funding Finder.
3.	What involvement and consultation has been done in relation to this policy? (e.g. with relevant groups and stakeholders)	RICHeS has progressed through a robust HM Treasury Green Book Business Case approvals process, including several stages of review within UKRI, a Gateway 2 Review and final approval from HM Treasury. Considerable community engagement has taken place, with an Expression of Interest stage and scoping work/analysis undertaken by two policy and evidence fellows. RICHeS has had further stakeholder engagement, including regular meetings with the National Heritage Science Forum (NHSF), a Project Board and series of community

<ul> <li>achievements of AHRC's Capability for Collections (CapCo) and Creative Research Capability (CResCa) programmes, which have increased heritage science capabilities within individual institutions. Through creating a headquarters for strategic leadership, building a network of facilities and expertise and building a digital portal, RICHeS now seeks to build on this success to drive a step-chang in UK heritage science capability.</li> <li>Who is affected by the policy/funding activity/event?</li> <li>What are the arrangements for monitoring and reviewing the actual impact of the policy/funding activity/event?</li> <li>What are the arrangements for monitoring and reviewing the actual impact of the policy/funding activity/event?</li> <li>Monitoring will be undertaken by the Infrastructur Headquarters (IHQ), based at Daresbury Laborator The IHQ will provide operational and programme management, as well as administrative support to RICHeS. Due to the scale and complexity of this funding opportunity, additional guidance and support will be given by IHQ to ensure the delivery of the Digital research Service. Monitoring activitie are designed to provide assurance that the project is being implemented and operating as planned. Initially, monthly reporting against agreed milestones and specifications will be expected. This</li> </ul>			
<ul> <li>well as their users and stakeholders.</li> <li>What are the arrangements for monitoring and reviewing the actual impact of the policy/funding activity/event?</li> <li>Monitoring will be undertaken by the Infrastructur Headquarters (IHQ), based at Daresbury Laborator The IHQ will provide operational and programme management, as well as administrative support to RICHeS. Due to the scale and complexity of this funding opportunity, additional guidance and support will be given by IHQ to ensure the delivery of the Digital research Service. Monitoring activitie are designed to provide assurance that the project is being implemented and operating as planned. Initially, monthly reporting against agreed milestones and specifications will be expected. This will eventually move to quarterly reporting against agreed KPIs to track the type and quantum of inputs, activities and outputs associated with each</li> </ul>	4.	Who is affected by the policy/funding	(CapCo) and Creative Research Capability (CResCa) programmes, which have increased heritage science capabilities within individual institutions. Through creating a headquarters for strategic leadership, building a network of facilities and expertise and building a digital portal, RICHeS now seeks to build on this success to drive a step-change in UK heritage science capability.
<ul> <li>monitoring and reviewing the actual impact of the policy/funding activity/event?</li> <li>Headquarters (IHQ), based at Daresbury Laborators The IHQ will provide operational and programme management, as well as administrative support to RICHeS. Due to the scale and complexity of this funding opportunity, additional guidance and support will be given by IHQ to ensure the delivery of the Digital research Service. Monitoring activitie are designed to provide assurance that the project is being implemented and operating as planned. Initially, monthly reporting against agreed milestones and specifications will be expected. This will eventually move to quarterly reporting against agreed KPIs to track the type and quantum of inputs, activities and outputs associated with each</li> </ul>		activity/event?	
Additionally, AHRC is commissioning a process evaluation, to evaluates the processes used to commission and implement the project, enabling lessons to be learnt regarding effectiveness and efficiency. An external Impact evaluation to evaluate what impact the project might have had, where, for whom, when and how is also planned, alongside a baseline assessment of the heritage science community, in terms of funding, collaboration, innovation and access.Monitoring will be the responsibility of IHQ (in conjunction with AHRC) which will then report to the Programme Board. Evaluation will be undertaken by external experts, to coincide with when the main project components have been awarded and approvals granted.	5.	monitoring and reviewing the actual impact of the policy/funding	Monitoring will be undertaken by the Infrastructure Headquarters (IHQ), based at Daresbury Laboratory. The IHQ will provide operational and programme management, as well as administrative support to RICHeS. Due to the scale and complexity of this funding opportunity, additional guidance and support will be given by IHQ to ensure the delivery of the Digital research Service. Monitoring activities are designed to provide assurance that the project is being implemented and operating as planned. Initially, monthly reporting against agreed milestones and specifications will be expected. This will eventually move to quarterly reporting against agreed KPIs to track the type and quantum of inputs, activities and outputs associated with each project component. Additionally, AHRC is commissioning a process evaluation, to evaluates the processes used to commission and implement the project, enabling lessons to be learnt regarding effectiveness and efficiency. An external Impact evaluation to evaluate what impact the project might have had, where, for whom, when and how is also planned, alongside a baseline assessment of the heritage science community, in terms of funding, collaboration, innovation and access. Monitoring will be the responsibility of IHQ (in conjunction with AHRC) which will then report to the Programme Board. Evaluation will be undertaken by external experts, to coincide with when the main project components have been

Protected	Is there a potential	Please explain and give	Action to address

		need to be accessible.	in mind, making sure
			reasonable adjustment for
			current and future users
			are included in the design
			of proposed facilities and
			equipment. Improvements
			to the findability, usability
			and interoperability of
			data and resources may
			benefit users with
			disabilities by providing
			greater levels of access,
			including virtual or digital
			access to collections and
			data.
			The call will be live for
			three months, which
			should allow applicants
			with disabilities time to
			obtain support in the
			application writing process
			at their organisations and
			to discuss suitable working
			arrangements for their
			proposed project.
			· · · · · · · · · · · · · · · · · · ·
			There is a risk of low
			representation of people
			with disabilities among the
			applicants and successful
			candidates. To avoid this,
			we will advertise through
			UKRI channels which are
			designed with accessibility
			in mind. We will also share
			the opportunity with

r	1	
		relevant organisations and stakeholders. As this is a new funding opportunity, we will monitor outcomes. We will use lessons learned from the call to decide if positive action should be undertaken within any future AHRC calls to attract candidates with disabilities.
		Online platforms of engagement and participation (e.g. Zoom) can remove physical constraints and enable greater accessibility for people with mobility issues. The use of these platforms will be encouraged, but with due consideration to the needs of people who find videoconferencing challenging (e.g. due to being neurodivergent or other reasons).
		Applicants should discuss any accessibility needs in confidence. Following such conversations, AHRC expects efforts to be made by the applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with 2010 Equality Act and EDI policies at receiving organisations, and inspired by UKRI's policies and approach to equality, diversity and inclusion.
		Any travel and subsistence expenses beyond the most economic level which are incurred due to a disability can be requested in, and

			covered by, the project grant.
Gender reassignment	Possible negative impact	Applicants who have had/are in the process of gender reassignment may feel disinclined to apply if our language isn't sensitive. Therefore, gender neutral language is important to support inclusivity, equality and representation. Applicants who have had/are in the process of gender reassignment might feel more comfortable using gender-neutral facilities.	AHRC will use gender- neutral language, e.g. pronouns such as 'they' or 'you' instead of 'he/she', in the call documents, in the interim reporting and in the end-of-award reporting. By publishing this EIA, we will also encourage applicants to use gender neutral language throughout their interactions. We encourage applicants to meet best practice in relation to the employment of transgender staff such as that laid out in the Government Equalities Office guidance on 'The recruitment and retention of transgender staff'. Applicants should discuss any personal needs of staff involved in the project based on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by the applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion.
Marriage or civil partnership	No impact	The call is open to all eligible applicants and there are no barriers to those who are married or in a civil	Applicants should agree if there is a need to relocate their staff on a temporary basis with the staff, in a

		partnership apart from, potentially, the need to relocate for the duration of the project and temporarily live away from their home and partner. Data on participant's marital or partnership status will not be sourced.	way that's sensitive to their family situation and civil partnership/marriage. Applicants and their staff should discuss any personal needs based on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by the applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion. informed by UKRI's policies and approach to equality, diversity and inclusion, as well as EDI policies at receiving organisations.
Pregnancy and maternity	Possible negative impact	Pregnant persons, who are on maternity leave may miss the application deadline whilst on leave. Pregnant persons and persons with caring responsibilities may require additional adjustments to enable participation in the projects.	AHRC and UKRI gives the applicants a great flexibility to design the project to allow participation of pregnant persons. Principal Investigators and staff involved in the project will be entitled to maternity leave in line with their current terms and conditions of employment. UKRI standard Terms & Conditions of FEC Grants will apply to awards. UKRI will be flexible in considering requests to suspend or reschedule projects to account for periods of parental leave

-		[	
			including maternity,
			paternity and adoption
			leave. We leave working
			day arrangements to the
			applicants. We expect that
			scheduling sufficient
			breaks during in-person
			interactions (virtual and
			physical) will provide a
			greater comfort for
			pregnant participants;
			flexibility in the scheduling
			of projects may similarly
			improve participation.
			Applicants should discuss
			any personal needs based
			on this protected
			characteristic in
			confidence. Following such
			conversations, AHRC
			expects efforts to be made
			by applicants to provide
			reasonable adjustments
			and a welcoming work
			culture. This should be
			compliant with the EDI
			policies at the receiving organisation and inspired
			by UKRI's policies and
			approach to equality,
			diversity and inclusion.
			arversity and metasion.
			The call is going to be live
			for three months which is
			a generous
			duration. However, some
			potential candidates who
			are on maternity leave
			might miss the deadline.
Race	No impact	Every UKRI funding	There is a risk of low
		opportunity is open to	representation of Black,
		candidates of all ethnic	Asian and ethnic minority
		backgrounds. AHRC and	groups among the
		UKRI designed the call to be flexible to make it inclusive	applicants and successful candidates. This might

We will also share the opportunity with relevant organisations and stakeholders. As this is a new funding opportunity, we will monitor outcomes. We will use lessons learned from this call to decide if positive action should be undertaken within any future AHRC calls to attract BAME candidates. Applicants should discuss any personal needs based
			any personal needs based on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion.
Religion or belief	Possible negative impact	Potential candidates or receiving organisations members who may be on leave due to a religious celebration may miss the application deadline. Apart from the above, we do not anticipate a person's religion or belief would impact on their application. Data on religion or belief will not be sourced.	The call will be live for 3 months to reduce the impact of any clashes with religious holidays or celebrations. Applicants and their employers should discuss any personal needs based on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by the applicants and their employers to provide

			reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion.
Sexual orientation	No impact	We do not anticipate a person's sexual orientation would impact on their application. Data on applicants' sexual orientation will not be sourced.	AHRC and UKRI gives the applicants and partner organisations a great flexibility to design the project to allow participation of persons of all sexual orientations. Applicants and their employers should discuss any personal needs based on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by the applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies and inspired by UKRI's policies and approach to equality, diversity and inclusion.
Sex (gender)	Potential negative	See 'Pregnancy and maternity'. Another gender- specific barrier might occur if a candidate is going through the menopause at the point of applying or during a project, or is experiencing any sex- specific health issue, e.g. prostate cancer or ovarian cancer. The point about inclusive language made under 'Gender reassignment' is also important here due to persons who identify as	The duration of the call being live – three months – is generous and should allow inclusivity. AHRC and UKRI give the applicants a great flexibility to design the project to allow participation of all sexes and genders. We encourage part-time and hybrid arrangements. Applicants and their employers should discuss any personal needs based

<b></b>	I		
		non-binary/ gender-queer or transgender (irrespective of whether they had gender reassignment).	on this protected characteristic in confidence. Following such conversations, AHRC expects efforts to be made by applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion. AHRC will use gender- neutral pronouns such as 'you/they' instead of 'he/she' in the call documents and reporting. By publishing this EIA, we also want to encourage applicants and their organisations to use gender neutral language throughout their
Age	No impact	AHRC and UKRI designed this scheme to make it inclusive. The flexibility might appeal to and benefit persons across a wide range of adult age groups. The scheme is open for candidates at all career stages from early career to senior working professionals of all sectors, including academia.	interactions. The scheme is open for candidates from each career-level group above doctoral/equivalent experience, and to a wide range of potential project partners. Our reviewers/assessors are going to assess applicants at all career stages/of different ages fairly and transparently, according to the same criteria and taking into consideration experience in the context of career stage. Applicants and their employers should discuss any personal needs based on this protected characteristic in confidence. Following such conversations, AHRC

	expects efforts to be made by applicants to provide reasonable adjustments and a welcoming work culture. This should be compliant with the EDI policies at the receiving organisation and inspired by UKRI's policies and approach to equality, diversity and inclusion.
	diversity and inclusion.

## Evaluation:

Qu	estion	Explanation	/ justification
Is it possible the proposed policy or activity or change in policy or activity could discriminate or unfairly disadvantage people?		We cannot envisage such eventualities as the call will be judged and assessed on individual merit of applications, institutions and research teams. However additional T&Cs will be put in place to ensure some tangible adjustments. This call, in the nature of its design, is open to all arts and humanities researchers. There are no restrictions on discipline remit, provided that applications meet the criteria of this call and proposals are within or partially within AHRC's remit. AHRC will ensure that the infrastructure being built through this call across the strands is accessible and inclusive.	
Fin	al Decision:	Tick the relevant box	Include any explanation / justification required
1.	No barriers identified, therefore activity will <b>proceed</b> .		
2.	You can decide to <b>stop</b> the policy or practice at some point because the data shows bias towards one or more groups		
3.	You can <b>adapt or change</b> the policy in a way which you think will eliminate the bias		
4.	Barriers and impact identified, however having considered all available options carefully, there appear to be no other proportionate ways to achieve the aim of the policy or practice (e.g. in extreme cases or where positive action is taken). Therefore you are going to <b>proceed</b> <b>with caution</b> with this policy or	x	We are aware that some potential applicants may miss the deadline for the funding opportunity due to maternity leave or religious reasons, however we have tried to mitigate this by having the call remain open for three months. There is no other proportionate way to

practice knowing that it may favour	manage this, so we will proceed with
some people less than others, providing justification for this decision.	caution.
